MID-TERM ADDRESS

OF

HON. FRANCIS J. LAWLER

MAYOR OF NEW BEDFORD

TO

CITY COUNCIL

JANUARY 5, 1961

Reynolds-DeWalt

MID-TERM ADDRESS
OF
HON. FRANCIS J. LAWLER
TO
CITY COUNCIL
JANUARY 5, 1961

MR. PRESIDENT, GENTLEMEN OF THE COUNCIL:

As we embark upon the second year of the decade of the 'Sixties, I view our mutual objectives as primarily those of continued forward progress and fulfillment.

We have already mapped our blueprints.

We have initiated several of our projects.

Our job is to implement and complete them.

Before commenting this evening on the several programs, fruition of which would bring us to the threshold of a new municipal frontier, I would first bespeak more cooperation, less delay, better mutual understanding, and a minimum of arbitrary opposition on the part of some members of your Honorable Body.

Under our charter of city government, I think we all concede that any sound or progressive program of municipal improvement must necessarily be launched and guided under executive leadership. Budgetary considerations and full time exploration of financial ways and means make such a course inevitable.

This does not mean that cooperation and assistance from all municipal agencies, including the City Council, are not vital to the success of any executive program.

Impeding the progress of worthwhile projects, and unwarranted delay in giving legislative consent to programs recognized nationally as necessary and desirable on a municipal level, however, are not examples of cooperation and assistance.

Blind opposition for the mere sake of opposition, based generally upon political considerations without proposal of constructive alternatives, is neither good legislative practice nor wise statesmanship. For our citizens, gentlemen, it must be frustrating to witness our progressive efforts bogged down in the mire of indecision and delay when other cities and towns speedily avail themselves of new methods, new services, and new facilities.

During this past year alone, while great strides have been made in certain fields, the delays in implementing the medical health center program and the off-street parking project seriously handicapped the orderly advance of progress in these two deficient areas of public service.

If any one of you — or all of you — can conceive, suggest, or devise any better ways of effecting these and other municipal improvements, by all means, propose them — and you will find me a willing and cooperative partner.

On the positive side of the ledger, achievements of the past year have proved encouraging and fruitful.

The program of my administration in its constant drive for enticement and establishment of new and diversified industry advanced remarkably.

The Quaker Oats Company agreement is a reality, and the engineering goes steadily forward on the site north of the Fairhaven Bridge.

In fact, I can now state that I hope it may soon be necessary to come before you to seek approval for acquisition of additional development area in the same vicinity to accommodate additional industries.

The attraction of the Industrial Park for industries seeking modern plants has already been proven. The third and fourth tenants are now in operation, and the diligent efforts of the Industrial Development Commission give me confidence to express the prediction that they will soon be joined by additional occupants.

Through your prompt action, a feasible site for the proposed fish pier, headed by an adaptable building, is now the subject of land engineering and marine survey.

I think, in view the progress made this past year north and south of the Fairhaven Bridge, the time has come for the Harbor Development Commission to give serious consideration to the employment of an Executive Director, who can render to harbor development the same services which Mr. Hallet has devoted to the Industrial Park. In my opinion, the potential of these areas is enormous, and I feel certain that the Quaker Oats precedent can be duplicated.

The Urban Redevelopment Authority has now under active consideration a working draft of a master development plan under the terms of which a cohesive and integrated program of redevelopment and rehabilitation will be charted. Due to extreme difficulty in procuring the services of a professional .planner, our progress in this municipal field suffered delay, and we lagged far behind the aggressive programs of such cities as Boston and New Haven. We are now in full compliance with the State and Federal laws which will permit participation in such programs, and I can assure you that City Planner Wengraf and his Assistant are studying every aspect of our land and water areas — business, industrial, residential, highways, streets, public buildings, and waterfront — to construct the skeleton of a revamped and better New Bedford.

Only a few days ago, Routes 195 and 140 took further steps toward reality by announcement that plans for completion, with estimated costs, will be ready in March and April of this year for New Bedford sections, and ground was broken to start the span of 195 over the Taunton River into Fall River.

On Tuesday last, Congressmen John McCormack and Hastings Keith in Washington renewed their efforts to reduce State and local financial participation in the New Bedford Hurricane Dike Project from 30 to 22 percent. With the new administration in Washington already committed to a constructive conservation program, I shall make every effort during the next few months to urge favorable consideration of the proposed legislation by the current session of the Congress. Removal of the threat of hurricane and tidal wave disaster to New Bedford Harbor is vital to every aspect of our welfare and economy.

In the field of municipal finance, it is my intention this year to explore with other Mayors and the Selectmens' Association the immediate possibility of inducing the General Court to enact legislation to improve procedures for collection of local taxes and to expedite payment of financial allocations from the State to cities and towns.

For eleven months in each year, large amounts of non-interest bearing intended tax payments lay idle in the vaults of mortgage banks. Many owners of unmortgaged homes can better afford, and would prefer, quarterly or semi-annual payment of taxes. More importantly, **all** taxpayers would benefit by such a program of installment tax payments because it would result in more complete collections and greater elimination of municipal borrowing in anticipation of taxes.

With every city and town in the Commonwealth beset by problems of taxation, I am convinced that more effective and efficient collection procedures would immeasurably aid the much desired goal of tax reduction.

As you are aware, the problems of salaries and benefits justly due our municipal employees are matters for perennial consideration.

I believe our recently adopted salary schedules are fair, equitable and non-discriminatory.

The time has come, in my opinion, however, to extend serious consideration to the adoption of an insurance program covering city employees on a group basis.

With the acceptance of the provisions of Chapter 32B of the General Laws by the City, we are now in a position to implement the proposed insurance program.

After appropriate study, therefore, I hope to submit to you, by mid-year, the details of a municipal employee insurance program which will extend this "fringe benefit" to city workers on a basis comparable to that operating in private industry.

In connection with the constant search for revenue to help defray the cost of municipal operations, you will recall that in the past I have suggested that a fee schedule be adopted and charged for the services rendered by certain departments.

Presently, the cost of such services are borne by all taxpayers, even though the services themselves are individual in nature and, generally, benefit only the applicant who requests them.

A few years ago, the City of Boston, presently faced with the possibility of a $104.00 tax rate, enacted a comprehensive ordinance establishing a moderate fee schedule for the various services rendered by the several municipal departments. Operating costs, represented largely by salary and equipment expenses, were thus reduced, and to some extent at least, several departments were made self-sustaining.

I propose, therefore, to appoint a committee to explore the possibilities of suggesting and drafting such a fee schedule for such of our municipal agencies as render what may be considered to be "individual services."

After such study and analysis, suitable recommendations will be submitted to you gentlemen for appropriate action.

As a final suggestion at this time, I wish to point out the continuing necessity of expanding our educational facilities in the light of increasing demands for trained and skilled personnel to staff the plants and offices of our anticipated diversified industries.

I propose to explore thoroughly the possibility of establishing here the equivalent of a "Community College," adaptable to the needs of New Bedford. Presently, I am advised that such a two-year college program could be initiated by taking advantage of the faculty and physical facilities of the New Bedford Vocational School, particularly in the fields of technical, scientific and electronic training.

Under the National Defense Act, matching State and Federal funds are available to implement such a program; and under it, our citizens who have completed high school would have an opportunity for higher education in a wider field of occupational endeavor.

The limitations of space in existing colleges, and the constantly increasing demand for college entrance by high school graduates clearly indicate that such a community college would be uniquely beneficial to both our prospective college students and local employers who need trained personnel.

The foregoing items of municipal concern constitute a relatively small proportion of the major problems with which we are faced at mid-term.

You and I are aware that there are many facets of municipal affairs which need development and possible re-organization as we constantly strive to adapt the cumbersome machinery of government to the necessities of an age dominated by tremendous scientific advancements and radical economic changes.

If we can make concrete our vision of the civic future, if we can co-operatively use our combined intelligence to achieve it, and if we would all dedicate ourselves to the ideals of public service, we can produce a better and more prosperous New Bedford.

We are living in an age of jet propulsion. As individuals and as citizens, we must make certain that our civic progress is attuned to that age.

With unity of purpose and harmony of operation, we can make our beloved city an integrated part of this new age.

14th Annual Report

of the

AIRPORT MANAGER

of the

NEW BEDFORD MUNICIPAL AIRPORT

For the Year Ending 1960

BRADBURY-WARING, INC.
New Bedford, Mass.
1961

January 1, 1961

To the Honorable Francis J. Lawler, Mayor, and the Gentlemen
of the City Council of the City of New Bedford.

Gentlemen:

There is enclosed the Annual Report of the Airport Manager for the year 1960.

The New Bedford Airport Commission concurs in the recommendations of the Airport Manager for the next year.

Respectfully submitted,

CHARLES B. BLYTHE, Chairman
New Bedford Airport Commission

NEW BEDFORD AIRPORT COMMISSION

January 1, 1960

NAME	TERM EXPIRES
Charles B. Blythe, Chairman	January 1961
Bernard P. Tavano, Vice Chairman	January 1961
Jack G. Caron	January 1960
Gustave LaStaiti	January 1962
Alfred J. Menard	January 1962

December 31, 1960

The New Bedford Airport Commission:

Gentlemen:

December 31, 1960 marks the end of the fourteenth full year during which the City of New Bedford has operated its Municipal Airport.

The number of takeoffs and landings recorded by the Federal Aviation Agency Control Tower during 1960 totaled 45,080 compared to 37,413 during 1959, an increase of 7,667.

The following percentages, based on the total number of takeoffs and landings of the past two years, show clearly the type of aircraft now using the field:

TYPE		1959		1960
Scheduled Airlines		15.02%		12.84%
Itinerant Aircraft:				
USAF	3.92%		8.05%	
Navy	1.17%		1.93%	
Civil	37.07%	42.16%	38.72%	48.70%
Local Aircraft:				
USAF	9.87%		17.96%	
Navy	3.61%		3.50%	
Civil	29.34%	42.82%	17.00%	38.46%

The following chart shows the number of takeoffs and landings recorded during the years 1959 and 1960 and the number of days they were recorded.

Number of takeoffs and landings	Number of days during the year	
	1959	1960
200 or more	18	44
100–199	169	190
75– 99	58	39
50– 74	46	23
25– 49	32	27
15– 24	13	18
10– 14	12	6
5– 9	6	7
1– 4	8	6
0	3	6

HIGHLIGHTS OF THE YEAR'S ACTIVITIES:

In January, the Air Service Caravan Company was granted a new ten year lease effective February 1, 1960 with the stipulation that on February 1, 1964 their rent would be increased from $900.00 yearly to $1,200.00 yearly to the date of termination.

In February, the High Intensity Approach Light System installed by the Federal Aviation Agency on the approach to the instrument runway was commissioned.

Also in February, a one year lease was awarded to Mr. Charles H. Smith to operate the airport restaurant at an annual rental rate of $1,500.00.

In March, a contract between the City of New Bedford and the New Bedford Gas & Edison Light Company was approved by the Airport Commission for burying, relocating and abandoning certain utility service lines and poles located on New and Old Plainville Roads at a cost not to exceed $4,931.00.

Avelino C. Freitas was appointed a member of the New Bedford Airport Commission replacing Jack G. Caron whose term expired.

During April, Charles B. Blythe was re-elected Chairman of the New Bedford Airport Commission and Bernard P. Tavano, Vice Chairman, for the year 1960.

The sidewalk at the entrance to the Administration Building was extended to the automobile parking area at a cost of $351.00. Also, a shrub and flower area was developed in the rotary circle with the assistance of the New Bedford Garden Club and a $125.00 donation by Airport Commissioner Gustave LaStaiti.

The Airport Commission voted to approve the hiring of a temporary employee during the summer months to replace any permanent employee on vacation.

In May, the Airport Commission voted to approve the purchase of a mobile radio transceiver for the airport crash truck at an approximate cost of $400.00.

At the request of City Planner, Richard J. Wengraf, a ten year capitol improvement program was prepared by the airport manager and approved by the Airport Commission.

Mr. George Murray, Jr., our Building Maintenance Craftsman, retired from his position and was presented a wrist watch by the other city employees.

In June, contracts were awarded to W. H. Hughes, Inc. of Watertown, Massachusetts, for their low unit price bid of $29,824.50 for a new taxiway lighting system, and to Edward R. Sieminski of Westport, Massachusetts, for grading and drainage work plus an addition to the electric control building at his low unit price bid of $8,705.00.

Also during this month, the Airport Commission entered into grant agreements with the United States Government in the amount of $30,609.00 and the Commonwealth of Massachusetts in the amount of $15,305.00. These amounts were granted to cover 75% of the cost of the above mentioned contracts, the remaining 25% was appropriated by the city in 1959.

Ricardo Dutra, a temporary Junior Building Custodian, whose name was also on the Civil Service Building Maintenance

Craftsmen list was selected to fill the vacancy created by the retirement of George Murray, Jr.

In July, city employees painted the exterior of the administration building and the Fire and Crash Truck Station.

During the month all major cracks on the runways were filled in and resurfaced.

Also, installation of a new power unit in the rotary snow plow was completed at a cost of $832.96. The original unit was twenty years' old.

In August, the Massachusetts Air Industries purchased additional flying equipment and re-established student flight training at the request of the Airport Commission.

The airport street lighting system, inoperative for many months, was repaired at no cost to the city.

The Police and Fire Signal Systems on Plainville Road were relocated by city employees during August due to the obstruction removal project being conducted in that area.

In September, a contract for the installation of four insulated glass units in the control tower was awarded to Guido's Plate Glass Service at their low bid price of $1,150.00.

Joseph B. Lafferty was hired from the Civil Service list to fill the Junior Building Custodian vacancy.

By October, the majority of land taking and building removal in relation to the 1958 Federal and State Aid Program had been accomplished.

A one year lease renewal was granted to Alvin Cronig for a gift and photo shop on the first floor of the Administration Building at a yearly rental rate of $744.00.

In November, a one year lease was granted to E. Anthony & Sons, Inc., for the office and counter space on the first floor of the Administration Building at an annual rate of $660.00.

Final arrangements were being made in December for the airport to receive surplus equipment on a donation basis directly from the United States Government.

RECOMMENDATIONS FOR THE YEAR 1961:

1. Complete the acquisition of avigation easements started in 1959.

2. Continue efforts to obtain a new foam crash truck.

3. Carry to completion our efforts to obtain government surplus material such as a bulldozer, rotary snow plow, etc.

4. If Federal and State Aid funds are made available, complete the following projects:
    a) provide a new 12" water main in place of our present system which is inadequate.
    b) resurface and paint air markers on both runways.
    c) erect a restaurant addition to the Administration Building.
    d) install taxiway lights to runways 14 - 32.

5. Continue efforts to improve the highway approaches to the airport.

6. Continue efforts to improve the scheduled airline service.

7. Continue efforts to seek airline service to the West.

8. Remove all trees at the approach end of Runway 32 that constitute obstructions.

9. Continue efforts to attract new revenue producing activities.

10. Continue efforts to improve unused land on the airport.

It is essential to receive cooperation and assistance from many sources in the successful operation of a municipal airport for a full year. In this connection, the airport manager is extremely grateful to all those whose cooperation and assistance helped make the year 1960 as successful as it was and requests their continued support for the year 1961.

Respectfully submitted,
JASON G. TAYLOR
Airport Manager

CITY OF NEW BEDFORD

NEW BEDFORD MUNICIPAL AIRPORT
New Bedford, Massachusetts

STATEMENT OF INCOME AND EXPENSES

SUPERINTENDENT AND INSPECTOR OF BUILDINGS

ANNUAL REPORT

1960

In accordance with Chapter 7, Section 158 of the City Code of the City of New Bedford, I hereby submit a report of the activities of the Superintendent of Buildings for the calendar year of 1960.

BUILDING DEPARTMENT

During 1960, Seven Hundred Thirty-five (735) permits were issued. This was thirty-seven (37) less than 1959. The total valuation for 1960 was Two million thirty-four thousand, eight hundred and eighty dollars ($2,034,880.00) and this was Six hundred and three thousand, one hundred seventy-four dollars and ninety-eight cents ($603,174.98) less than 1959.

Some of the outstanding permits were:

Fernandes Super Market	$170,000.00
New Bedford Hotel	75,000.00
Redley Realty Corp.	28,000.00
Pacific Oil Co.	30,000.00
Order of Friars Minor of Province	500,000.00
Leo Gordon	85,000.00
North Bedford Realty Corp.	65,000.00
North Bedford Realty Corp.	225,000.00
Madison Nursing Home	80,000.00
Swain School of Design	32,000.00
Andrew Dahill Post	31,400.00
Loyal Order of Moose	46,000.00

The Incinerator Plant was completed and conditionally accepted in the early part of 1960 and has been on a trial and guarantee basis for the year. The final payments on A and B Contracts should be made about Feb. 4, 1961.

On August 2, 1960, a contract was awarded to Joseph Harris d/b/a Cape Lumber and Salvage Co. for the demolition of parts of a masonry building known as the No. 1 Whitman Mill, including boiler and engine rooms, pump house, round house, oil or gasoline tanks and stack. The job was completed on or about Dec. 1, 1960.

On August 16, 1960, a contract was awarded to J. J. England and Sons for the demolition of the Harrington Memorial School, which was damaged by fire on May 28, 1960. Completion was about Sept. 19, 1960.

SUMMARY OF BUILDING PERMITS
1960

	Permits	Estimated Cost
*New Construction	228	$1,432,116.00
**Alterations and Additions	337	557,364.00
Heating	53	45,400.00
Demolitions	113	
Stagings	4	
	735	$2,034,880.00

*NEW CONSTRUCTION:

Dwellings	143	$ 166,800.00
Stores, Bus., Mfg.	24	547,500.00
Garages	15	49,150.00
Filling Station	1	30,000.00
Schools, Hosp., Instit.	3	605,000.00
Misc.	42	33,666.00
	228	$1,432,116.00

**ALTERATIONS AND ADDITIONS:

Dwellings	244	$ 134,074.00
Bus., Mfg., Etc.	65	214,225.00
Churches, Schools and Hospitals	9	188,100.00
Misc.	19	20,965.00
	337	$ 557,364.00

There were one hundred and forty-three (143) new one-family dwellings and ten (10) new apartments added by conversion.

Comparative Summary of Construction for the Last Five Years

Year	No. of Permits	Estimated Cost
1956	1,072	$5,454,450.00
1957	965	3,345,584.00
1958	746	2,994,226.00
1959	772	2,638,054.98
1960	735	2,034,880.00

During the year 1960 the Department made 64 special investigations. Special investigations are made as a result of a complaint by a tenant or a neighbor relative to a violation of zoning or building code.

There were 81 sign applications during 1960 which were forwarded by the City Clerk to be approved by this department as to construction, site of location and method of erection and maintenance.

The Massachusetts state law required that a thorough yearly inspection be made of all elevators, and a report of their condition made to the State Department of Public Safety.

There were 313 freight and 72 passenger elevators inspected during 1960.

Three new elevators were installed.

During the year the elevator operators' licenses issued were as follows:

Renewals	83
New Applications	20
	103

There were 37 appeals from the ruling of the Inspector of Buildings during the year 1960 relative to the application of the zoning ordinances.

Granted	29
Denied	1
Tabled	2
Withdrawn	4
Rescinded vote	1
	37

Appeals that are granted are reversals of the rulings of the Inspector of Buildings; while appeals that were denied upheld the Inspector's ruling.

Places of assembly must be carefully examined according to Chapter 143 of the General Laws, as amended, before a license for their use can be obtained; every building or part thereof, used as a place of public assembly and capable of accommodating 50 or more people; where 10 or more people are employed; rooming houses and apartment houses having eight rooms or 10 people above the second floor.

The following places of assembly were checked and issued certificates during 1960:

	Renewal	New
Cafes, Clubs, etc.	81	3
Office Buildings	1	
Mercantile		1
Industrials	8	3

During the year 1960, 28 Rooming Houses having 650 rooms were inspected. A report of each inspection was forwarded to the State Department of Public Safety.

A total of 4 inspections were made on Boarding and Convalescent Homes.

ANNUAL REPORT OF THE PLUMBING INSPECTORS
1960

NUMBER OF FIXTURES INSTALLED

Bath Tubs	512	Potato Machines	3
Water Closets	605	Floor Drains	53
Lavatories	663	Garage Drains	1
Sinks (Kitchen)	523	Misc. Drains	29
Slop Sinks	24	Conductors	73
Sink and Tray (Comb.)	1	Refrig. Wastes	35
Bar Sinks	7	Air Conditioning Units	12
Chemical Sinks	92	Sterilizers	0
Developing Sinks	2	Oil Separators	0
Wash Trays	129	Septic Tanks	52
Urinals	53	Boilers & Storage Systems	996
Shower Baths	60	Electric Hot Water Systems	9
Foot Baths	0	Gas Water Heaters	11
Dental Chairs	0	Oil Water Heaters	0
Soda Fountains	9	Tankless Heaters	136

Dish Washing Machines	38	Coils, Direct and Indirect Units	2
Clothes Washing Machines	190	Inst. Heating Units (Gas)	2
Drinking Fountains	18	Safety Valves (All types)	2046

BUILDING MAINTENANCE

The various buildings under our jurisdiction keep the Maintenance crew busy. Repairs are also made on buildings for other departments when requested.

Work in the Municipal Building consisted of the usual painting, plumbing and electrical repairs in various departments.

The North End Comfort and South End Comfort Stations were painted on the exterior and miscellaneous repairs were made on plumbing, heating and electrical.

Many closed schools and other buildings including Wood School, Cedar Grove St. School, Eastern Electric Co. Building, City Infirmary, Isolation Hospital, South End Police Station, Mary B. White School, were boarded up to protect against vandalism.

Even though the City Infirmary and Isolation Hospital are closed, a watchman is on duty at certain hours and coverage by the plumber is required to keep sprinklers, boilers, etc., in working order.

For the Park Department miscellaneous plumbing, electrical work, roof repairs and miscellaneous carpentry has been done at West End Youth Center, Children's Bathhouse, Municipal Bathhouses, Hazelwood, Brooklawn, Ashley, Buttonwood Parks and Mt. Pleasant Playground.

For the Fire Department the following repairs were made. No. 9 Fire Station glazing and repairing windows, repairs and patching roof etc. No. 10 Fire Station interior and exterior painting and repairing doors and windows. Center Fire Station, floor repairs etc. No. 5 Fire Station miscellaneous plumbing and electrical work. No. 3 Fire Station repairs and patching roof etc.

Miscellaneous maintenance repairs have been made at Mary B. White, Butler Mill, Spanish War Veterans, Veteran Administration Building (old Sylvia Ann Howland School), South End Police Station, North End Police Station, Center Police Station, Center Library, North End Library, South End Library, City Yard and City Garage, Oak Grove Cemetery, Stone Building, Veteran Firemen's Building, Incinerator Plant and New Bedford Airport.

Several dilapidated buildings were taken down as requested by the City Council.

The hurricane on September 12, 1960, caused damage to several city-owned buildings and repairs were made to the roofs at Sylvia Ann Howland School, Isolation Hospital, Spanish War Veterans Building, Municipal Building and City Infirmary.

Respectfully submitted,

EVELYN HENDRICKS,
Clerk of the Cemetery Board

BOARD OF CEMETERY COMMISSIONERS

To the Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen:

The Cemetery Board herewith presents its sixty-sixth annual report.

In 1960, Mrs. Beatrice Meekin, a cemetery attendant for our department, retired after twenty-eight years of service.

Three of our retired employees passed away, namely: Mr. Arthur J. Toussaint, Mr. Edward Dutra and Mr. Manuel Rezendes, Jr. They were all laborers while in our employ. The Cemetery Board expresses its sincere sympathy to the families of these men.

Mrs. Doris E. Parker was promoted from Senior Clerk to Temporary Principal Clerk and Miss Marguerite S. Guillet was promoted from Junior Clerk and Typist to Temporary Senior Clerk and Typist. Miss Noella R. Paradis was employed as a Junior Clerk and Typist at the Rural Cemetery office, and was transferred to the main office soon after.

Our new perpetual care system, which was put into effect January 1, 1960, has in our opinion been very successful to the department, and our lot owners have been very cooperative. Thirty-five thousand, nine hundred ninety-two dollars and fifty cents ($35,992.50) was placed in our new system perpetual care account, this year. This amount includes the perpetual care for all our new lots, as they are all sold with perpetual care now, and the perpetual care for old lots that were put into perpetual care, this year. Our first investment was made August 12, 1960, when we purchased twenty-eight thousand dollars ($28,000.00) worth of United States Treasury Bills. In 1961, we expect to instruct the City Treasurer to withdraw some of the old perpetual care accounts from the Savings Banks, so that we may reinvest them in other securities which are legal for the investment of funds of savings banks, under the laws of the Commonwealth, in order to obtain a higher rate of interest.

Money, made available from our Sales of Lots fund, was used to install a six-foot chain-link fence at the Pine Grove Cemetery, and a new water line was extended on Section 16.

We purchased a 1960 Chevrolet station wagon, a Thor jackhammer, and three seventy-inch (70 in.) Locke mowers. Twenty (20) dogwood trees were planted in Oak Grove Cemetery, and Circuit Avenue was black-topped from the receiving tomb to the Robeson Street entrance.

The need for new mowers and other grass-cutting equipment cannot be too strongly stressed, because in cutting the grass in all of our cemeteries and in order to fulfill our contract with the lot owners and keep our property in a presentable condition, we must have this much needed equipment annually.

We condemned and removed two large trees from Lots 247 and 249, Section S. W. Pine Avenue, Rural Cemetery.

The price of geraniums, which had been fifty cents (50c) for many years, was raised to seventy-five cents (75c) each.

Thirty-five (35) trees, which were uprooted in our cemeteries by the 1960 hurricane, have been removed and we hope money will be available from the Sales of Lots fund to replace them.

Mr. Carl Arneson, Board of Elections Commissioner, requested permission to use the Rural Cemetery office for the 1960 election, and in-as-much as the Dartmouth Street School was closed, his request was granted.

A request was made to the Building Department to cover the main office floor, which is in bad condition. We hope this work can be done in 1961.

Sixty lots and fifty-seven graves were sold and forty-one transfers and forty-one assignments were made this year. Of the sixty lots and fifty-seven graves that were sold, twenty-seven lots and twenty-two graves were sold in Rural Cemetery, three lots were sold in Oak Grove Cemetery, and thirty lots and thirty-five graves were sold in Pine Grove Cemetery. One hundred ninety-nine dollars was turned into the City Clerk's office for the recording fees on these transactions.

We take this opportunity to express our appreciation for the kindness, assistance and cooperation received from His Honor the Mayor, members of the City Council, Department Heads and our own department personnel.

Respectfully submitted,

J. TUNSTALL PARHAM, Chairman
JOSEPH J. BEATTIE, Secretary
RALPH E. SALTUS

SUPERINTENDENT'S REPORT

To the Board of Cemetery Commissioners

Gentlemen:

I herewith submit the annual report of the work done under my supervision during the year 1960 and recommendations for 1961.

RURAL CEMETERY

Speed signs and stop signs were installed in Rural Cemetery and this has cut down the speed of traffic in the cemetery. Part of a stone wall damaged by an automobile was replaced, trees damaged by the hurricane were taken down by our own men, and the stumps and roots were removed by employees from the Water Department and Department of Public Works. Park Department men cut up about twenty-five cords of wood for us. The water line that runs through Section 200, and which has given us trouble should be replaced, in 1961. To get the water pressure desired, we may have to run a new line in from Rockdale Avenue.

OAK GROVE CEMETERY

A new black-top road was laid from the Public Receiving Tomb, at Oak Grove Cemetery, to the Robeson Street entrance. This avenue has been in bad condition, caused by so much traffic coming in our Parker Street entrance, and leaving via Robeson Street. Dogwood trees were planted around the main entrance replacing trees that were blown down or taken down due to damage caused by the 1960 hurricane. A leaky 275-gal. fuel tank was replaced in the greenhouses and our greenhouse personnel grew approximately twenty-five thousand plants.

PINE GROVE CEMETERY

At Pine Grove Cemetery, we installed 555 feet of 6-foot high chain-link fence along the south line of the property. With the completion of this work, the entire cemetery is now enclosed with chain-link fence or stone wall. We, also, installed two hundred fifty feet of copper pipe water line between

Sections 15 and 16. The comments received from both of these projects have been very gratifying to the department. We hauled, approximately seventy-five loads of dirt fill into the single grave section from the Department of Public Works road jobs, and when completed, we expect to finish the layout of graves in this section.

GENERAL

With the completion of our new perpetual care system, it is my intention, in 1961, to do some research work relative to reclaiming for the City, plots in our various cemeteries, that have been neglected by the owner for several years. If, we are successful in the endeavor, it means that we can resell the unused portion of the plot and apply the income received, to properly maintain that part of the plot where interments have been made. In 1960, we entered a garden display in the Kiwanis Flower Show for which the Department received a certificate of appreciation. We have received an invitation to enter their show in 1961, and I recommend that we accept the Kiwanis invitation.

Vandalism has always been a source of trouble for us. In 1960, we had one hundred fifty-six headstones turned over in our cemeteries, all of which have been reset, seventy-eight panes of glass were broken in our greenhouses, and eleven faucets broken on our property.

Lots in cemeteries under our care, namely: Point Road, Friends, Griffin St., St. John's, St. Mary's, Sacred Heart, Tobey, Reynolds and Congregational Church were kept in good condition.

I express my thanks for the assistance I have received from your Honorable Board, his Honor Mayor Lawler, members of the City Council, Department Heads and their personnel, and especially to the employees of the Cemetery Department for the aid, cooperation and assistance during the year 1960.

SUMMARY OF WORK DONE IN 1960

REPORT OF CARETAKER
of
SOLDIERS' AND SAILORS' GRAVES

New Bedford, Mass.
January 1, 1961

To the Honorable City Council of the
City of New Bedford

Gentlemen:

I hereby submit the following report of the work done, during 1960, on neglected lots and graves where soldiers and sailors are interred, as authorized in Chapter 218, Acts of Legislature, 1920:

	Care of Lots and Graves
Rural Cemetery	184
Oak Grove Cemetery	151
Pine Grove Cemetery	23
Peckham West Cemetery	27
Congregational Church Cemetery	2
Griffin Street Cemetery	9
Polish National Cemetery	5
	401

The amount appropriated for this work was $2,500.00 and of this amount, $2,487.73 was expended for cutting grass, leaving a balance of $12.27.

Respectfully submitted,

JOHN THORNHILL,
Caretaker of Soldiers'
and Sailors' Graves

ANNUAL REPORT

BOARD OF CEMETERY COMMISSIONERS

for the year ending, December 31, 1960.

IN CITY COUNCIL

October 13, 1961

Received, placed on file and ordered printed in the City Documents.

CHARLES W. DEASY,
City Clerk

Attest:

CHARLES W. DEASY,
City Clerk

ANNUAL REPORT

OF THE

CITY AUDITOR

OF THE

CITY OF NEW BEDFORD

MASSACHUSETTS

FOR THE YEAR 1960

REYNOLDS - DE WALT
New Bedford, Mass.
1961

CITY OF NEW BEDFORD

Office of the City Auditor

To His Honor Francis J. Lawler, Mayor of New Bedford, and the Honorable City Council.

Submitted herewith are the following statements and schedules showing the receipts and expenditures for the City of New Bedford for the calendar year ending December 31, 1960 and the financial conditions.

Exhibit A—Balance Sheet as of December 31, 1960.

Exhibit B—Statement of Receipts for the year ending December 31, 1960.

Exhibit C—Statement of Expenditures for the year ending December 31, 1960.

Exhibit D—Summary of Receipts and Expenditures for the year ending December 31, 1960.

Exhibit E—Report of Appropriations, Receipts and Expenditures for the calendar year January 1, 1960 to December 31, 1960.

Exhibit F—Schedule of Bonded Debts and Sinking Funds as of December 31, 1960.

Exhibit G—Schedule of Indebtedness Payable at the close of the calendar years 1937 through 1960.

Exhibit H—Summary of Bonded Debt and Sinking Funds as of December 31, 1960.

The City of New Bedford closed the calendar year 1960 with a balance of $763,350.12 in the Excess and Deficiency Account.

I certify that in the course of the audit of the books and records of the City of New Bedford the cash on deposit and securities representing the investments of sinking funds of the City of New Bedford and several trust funds in the custody of the commissioners, trustees and city treasurer were verified and found that the same were in agreement with reports and records rendered by said commissioners, trustees and city treasurer to the City Council.

Respectfully submitted,

City Auditor

NOTE: Serafim E. Mello was City Auditor from January 1, 1960 through May 15, 1960 the period covering this report.

1955	2824	1044	1528
1956	2769	1016	1485
1957	2815	922	1551
1958	2692	830	1530
1959	2790	905	1517
1960	2751	864	1580

The excess of the birth rate over the death rate shows the ratio at which the community is reproducing itself by natural increases. In every year since the compilation of birth statistics was started, the birth rate has been higher than the death rate.

CITY COUNCIL

The New Bedford City Council organized on January 4, 1960, and at that time elected Councillor William Cormier of Ward Two as President for the year.

There were 24 regular meetings and 14 special meetings held during the year. One meeting did not convene until 11:30 P.M. We also had one meeting on Saturday afternoon and another on a Monday morning. Considerable time was spent on the proposal for Health Centers in the city and the acquisition of waterfront property for a public landing to improve our waterfront facilities. The proposed location of a federal highway to be known as Route 195 was the subject of prolonged discussions.

The budget of Mayor Lawler was presented to the City Council on the 18th day of February, 1960 and called for the appropriation of $15,445,035.51 to meet contemplated needs other than new equipment. The City Council sitting as a Quasi Committee of the Whole met on three occasions to hear department heads relative to their budgetary needs. On March 29, 1960, the budget was adopted, after several amendments, in the amount of $15,432,105.51. On April 28, 1960, the city council adopted an order submitted by Mayor Lawler for the transfer of $98,265.12 from available funds to be used for the purchase of new equipment.

ORDINANCES

On August 11, 1960 an ordinance was passed establishing the office of Assistant City Planner. On the same day Mayor Lawler submitted the appointment of Mr. Irwin M. Kaplan as Assistant City Planner. This gentleman came to New Bedford from New York City.

ELECTIONS

The Presidential Primaries were held on the 26th day of April, 1960. There were 11,367 ballots cast of which 8,467 were Democratic and 2,900 were Republican. The ballot was about the most confusing that I have ever seen and due to a change in the personnel at the Election Division in Boston, we did not receive our official list until so late that on the Saturday preceding the election, Miss Gaughan and I spent the day in the printer's office reading and correcting proof. The last box was not returned to the City Clerk's office until 3:45 A.M. on April 27th. This was the last election held under the supervision of the City Clerk, because of the establishment of an Election Commission on May 12, 1960. I had long advocated the creation of such a Commission in the interest of proficiency and because of the multiplicity of duties that had grown up around the conduct of elections.

BOARD OF ELECTION COMMISSIONERS

On recommendation of Mayor Lawler, the City Council on May 12, 1960 adopted an order accepting the provisions of Section 16A of Chapter 51 of the General Laws (Ter. Ed.) which provided for the establishment of a Board of Election Commissioners to replace the existing Board of Registrars of Voters. Said Commission took over all duties pertaining to the conduct of elections and the City Clerk was replaced by a new Commissioner.

On July 28, 1960, Mr. Carl A. Arneson, a Republican, was appointed an Election Commissioner at a salary of $5,000 per annum, and he was designated as the full time member of the Board.

GENERAL

With the advent of the election commission, we were able to reduce our staff by one and still render efficient, courteous and helpful service to the members of the community. We are fortunate in having experienced and cooperative employees, who are ever ready to assist Miss Gaughan, the Assistant City Clerk in establishing a high degree of genial public relations.

Respectfully submitted,
CHARLES W. DEASY,
City Clerk

ANNUAL REPORT

City Clerk, for the year 1960.

IN CITY COUNCIL

February 23, 1961

Received, placed on file and ordered printed in the City Documents.

OFFICE OF CITY SOLICITOR

OOM 203 MUNICIPAL BUILDING
NEW BEDFORD, MASSACHUSETTS

September 13, 1961

To the
Honorable City Council
New Bedford, Massachusetts

Gentlemen:

The following is the Annual Report of the City Solicitor for the fiscal year ending December 31, 1960.

In addition to a great many oral opinions given to the Mayor and City Council, and especially to department heads, this office rendered 25 written opinions.

252 Industrial Accident cases were reported to the Industrial Accident Board in Boston, which included filing of reports, investigations, and a number of hearings before the Board members.

Many claims were disposed of, including claims for injuries incurred as a result of defects in the highway and accidents involving city-owned vehicles. Many of these claims resulted in Court action.

Approximately 16 cases of forclosure for non-payment of taxes were entered in Land Court and many final decrees were received, resulting in sales by the city, thus putting the property once more back on the tax rolls.

Approximately $7,904.07 was collected by this office that the various city departments were unable to collect — unpaid school tuition bills, damage to hydrants and traffic lights, D.P.W. work, rent due airport, accidents involving city vehicles, etc.

All contracts awarded by the Purchasing Department and School Department were examined and approved by this office. Orders for easements, street widenings and layouts and leases pertaining to city-owned property were drafted and deeds of sales of city property were executed.

Land was acquired by eminent domain on the west side of the harbor as a Common Landing Place to develop our waterfront.

Transfer of portion of Brooklawn Park to Board of Health for a Health Center by a special Act of the Legislature was carried out through this office.

Agreement from the New Bedford Gas & Edison Light Co. to the City of New Bedford for permission to the New Bedford Fire Department to build a ramp for the Fire Department boat landing on the property of the company on Front and Walnut Streets was prepared in this office.

The following is a list of suits pending against the City of New Bedford as of December 31, 1960:

ANNUAL REPORT

OF THE

CHIEF

OF THE

FIRE DEPARTMENT

NEW BEDFORD, MASSACHUSETTS

FOR THE YEAR ENDING DECEMBER 31, 1960

Milton C. Andrews, Chief of Department

—Reynolds-DeWalt

FIRE DEPARTMENT REPORT

Mayor of the City of New Bedford—

Dear Mr Mayor:

I have the honor to submit my fourteenth annual report of the conditions and operations of the Fire Department for the year 1960, together with such recommendations as are deemed necessary for maintaining and increasing the efficiency of the department.

The total of alarms received for "Fires" and "Non Fires" for the year 1960 is 1518.

SUMMARY OF ALARMS RECEIVED

Fires	749
Emergency Calls	564
No Fire Found, Sprinkler Trouble, Etc.	115
False Box Alarms	65
False Telephone Alarms	23
Out of City Responses	2
TOTAL	1,518

Of the actual 749 fires, 681 originated as "Still Alarms" and in 127 cases were followed by "Box Alarms" for the original fire. Of the 749 actual fires, 68 originated as "Box Alarms" and in 8 cases were followed by "Still Alarms" for the original fire.

Total "Still Alarms" transmitted from Headquarters	752
Total "Box Alarms" transmitted from Headquarters	332
TOTAL	1,084

Of the total alarms transmitted, there were 749 actual fires. There were three Second Alarms during the year.

The total fire loss for the year 1960 is $408,947.33 of which the loss on buildings is $298,446.64, the loss on contents of buildings is $82,545.42, the loss on auto fires is $11,605.27, the loss on boats is $16,350.00.

This fire loss is nearly one-half less than in 1959. This loss is a conservative figure for a city of our area, population and with our many diversified industries. The Harrington School fire on May 28 and the Union Foodland fire of November 7 accounted for nearly half of the total loss for the year. It can easily be seen how one or two large, serious fires can mean the difference between a very low loss and a moderately higher loss.

The Emergency Special Calls, such as resuscitator service, washing down spilled gasoline or fuel oil, pumping out boats or cellars in homes, replacing flag pole halyards, etc., reached a total of 564 calls. These services to the public have become very broad in scope and we hope that our efforts are appreciated in our providing assistance in many ways far beyond routine fire calls.

9 Permits for Blasting were granted during the year.

The Fire Alarm Division, under the supervision of Acting Assistant Superintendent of Fire Alarm, Clifford J. Snell, has continued to make progress in improvements and additions to our fire alarm system. Three new fire alarm boxes were installed during the year. Progress has been made in fire alarm box protection in the parochial schools, only two remaining that have failed to provide a box on their property.

By the end of 1960, we had 253 Public Boxes and 167 Private Boxes, a total of 420 boxes, 3 more than the previous year. There are about 75 occupancies, such as some factories, stores, etc., whose sprinkler system is hooked up automatically with our fire department through Master Fire Alarm Boxes, providing an immediate alarm on a sprinkler flow. Some schools have auxiliary boxes on various floors, whereby an alarm can be transmitted to the fire department from any floor of the school building.

The fire alarm personnel assisted and cooperated fully in the work of the Christmas Display at the Common Park.

I wish to report that approximately 2,200 feet of underground fire alarm cable was pulled in at the Municipal Airport, same being made necessary because of pole removals, which had held our overhead wires. Some new cable was replaced at Sassaquin Sanatorium. New Fire Alarm Batteries were replaced on six circuits.

The Repair and Maintenance Division under the supervision of Master Mechanic Kenneth M. Haddock, provides efficient service in keeping our 38 automotive vehicles in proper condition. Overhauling, repairing, installing new parts, new motors, clutches, brakes, etc., is a continuing program so as to keep all cars safe and dependable. Eleven fire stations have to be maintained, which means hundreds of calls for repairs and service to toilets, pipe leaks, furnace troubles, doors, windows and various other jobs too numerous to mention. I have permitted and approved of Master Mechanic Haddock attending monthly meetings of the Master Mechanic's Association, where much valuable knowledge is secured, helpful in his work. I wish to report that many hundred man hours and considerable expense is involved in installing new motors, overhauling our small cars whose ages are from 8 to 14 years old, and which I believe is an unwise policy. Unless we are given new cars oftener, we are forced to spend money and try to keep them on the road.

The Fire Prevention Division, headed by Captain Ernest M. Torres, with his assistants, continues to efficiently carry out the many varied duties connected with that branch of our department.

Approximately 4,000 inspections were made during the year by said personnel. Considerable time is spent in factory inspections, particularly those of multiple occupancy, to eliminate hazards and improve conditions, as the life hazard is always present in factories. All suspicious, incendiary and arson fires are thoroughly investigated and proper action taken.

All gasoline filling stations, fuel oil and gasoline storage tanks, oil burners, are checked and corrections made, when necessary. License approvals and permits are granted according to requirements of law.

Cooperation to our schools was provided during Fire Prevention Week and on other occasions during the year, such as Christmas, etc., by means of talks and film showings. Talks and pictures were also presented to other civic groups, boy scout troops, etc., by fire prevention officers.

Permits issued by the division is as follows:

Power Oil Burners	575
Range, cabinet and space heaters	148
Garage and Filling Stations	14
Fuel Oil Storage	52
Liquified Petroleum Gas Storage	46
Underground Tank Removal	12
TOTAL	847

Rummage Sale and Second Hand Store licenses were approved, after inspections, a total of 110.

As required by law, regular and special inspections are made of Hospitals, Nursing Homes, Boarding Homes, Day Nurseries and Schools.

Praise has come to me from various sources regarding the excellent records kept in the fire prevention bureau and with the methods employed in conducting and carrying out the various duties to insure compliance with laws and ordinances. This work plays an important part in helping to keep our fire loss low over the years.

Deputy Chief Frank H. Cleveland and District Chiefs Charles J. McKenna, Charles J. Armanetti, Edward J. Jablonski, Daniel L. Piekut, Alphonse Piekut, James E. Harwood, Gordon W. Graham, made approximately 415 inspections during the year, checking complaints and remedying hazards and unsafe conditions. These district officers frequently take officers of companies to look over the layouts of factories to acquaint them with hydrant and sprinkler mains and to develop plans to handle the life hazard in factories and to plan how to extinguish any fires that might occur therein. The most important function of the assistant chiefs is the supervision and directing of operations at fires and other emergencies in a manner as to prevent loss of life or injury to our citizens and to our personnel and in efficiently confining and extinguishing fires.

Approximately 1,000 Open Air fire permits were granted, many visits being made to location before the permit being granted, to insure that it was safe to burn.

Under the direction of Deputy Chief Cleveland, assisted by the district chiefs, a new program of Home Inspections was started in April of 1960 extending through October. This will be a continuing yearly program. Approximately 5,000 buildings were inspected, which broke down represented about 9,000 homes visited, as many buildings were of two and three story type. We feel confident, from the long range viewpoint, that home inspections will result in a lessening of home fires and a reduced life and injury loss.

I am pleased to report that I receive excellent cooperation from the deputy and district chiefs in our joint efforts to maintain a high level of efficiency within our department. Under their direction, a program of monthly inspections of all schools by company captains and lieutenants has been carried out during the year.

Our Drill School and Training Program, under Captain Raymond G. Furness, has functioned efficiently during the year. A total of 174 drills were held at Station No. 10 training grounds and at the Coggeshall Street reservoir, covering all phases of fire department procedures. During the winter months and in inclement weather, a total of 162 indoor drills were held on suitable subjects.

Three weekly drills are also held each week by company officers in their stations and yards. Each pumper goes through a Service Test each year to insure proper pump performance and to meet underwriters recommendations. All fire hose is tested yearly.

Various training programs were conducted at Fort Rodman, New Bedford Rayon, General Services Administration and at St. Luke's Hospital.

I have permitted Captain Furness to attend monthly meetings of the Massachusetts Institute of Fire Department Instructors, where much valuable knowledge is acquired. Ten new firefighters were appointed to the department in January and received adequate training in all phases of firefighting before being assigned to various apparatus. This continuing training program year after year has brought increased knowledge and efficiency to our officers and firefighters.

The New Bedford Protecting Society, with their modern Salvage Truck, carrying a large amount of salvage and emergency equipment, which would compare favorably with any salvage truck in this part of the country, is manned by a commendable personnel who give many hours of free service to our citizens, continue each year to render a fine service. Their efforts are appreciated by the fire department and the public.

APPARATUS IN COMMISSION

10—Motor Pumping Engines, 5-1,000 G. P. M. and 5-750 G. P. M. engines, all with booster hose and water tanks. Four have built-in liquid foam tanks used for flammable liquid fires. Six carry large deluge guns for use on large fires.

1—Motor Pumping Engine, 200 G. P. M. with power take-off pump and water tank.

4—Aerial Ladder Trucks, 2-85 Ft. tractor type and 2-75 Ft. non-tractor type, all equipped with ladder pipes.

1—City Service Ladder Truck.

1—Rescue and Fire Boat, on trailer hitch-on call.

1—Hose Wagon with Booster and Water Tank, equipped with forestry hose, wet water device, flammable liquid fire fighting appliances—on call.

1—Automobile for the Chief.

1—Automobile for the Deputy Chief.

4—Automobiles for the District Chiefs.

1—Automobile for the Drillmaster.

3—Fire Alarm Trucks, one used only for pulling in cable.

3—Repair Division cars—2 trucks and 1 sedan.

3—Automobiles for Fire Prevention Division.

1—Automobile for towing Rescue and Fire Boat.

1—N. B. Protecting Society Salvage Truck.

APPARATUS IN RESERVE

2—Motor Pumping Engines, 1-1,000 G. P. M. and 1-500 G. P. M.

1—High Pressure Fog Truck with 435 gallon water tank.

During the year the following New Equipment was acquired and placed in service:
Main Radio Station and Remote Control Station.

17—Mobile Radio Units.

1—Impact Wrench for heavy apparatus use.

14—Fire Alarm Battery Units.

FIRE HOSE

800 feet of 3-inch hose.

28,000 feet of 2½-inch hose.

17,000 feet of 1½-inch hose.

500 feet of 1 inch high pressure hose.

4,500 feet of ¾-inch booster hose.

800 feet of ⅝-inch garden hose.

132 Waterproof Salvage Covers carried on apparatus.

10 Waterproof Salvage Covers carried on Protective Truck.

My thanks to our Mayor and the City Councillors for their cooperation in various matters for the good of the department.

My thanks also go to the Building, Wire, Water and Public Works Departments for their cooperation in various ways.

Appreciation is extended to Radio Stations W N B H and W B S M for their cooperation in fire news and fire prevention programs.

The Standard-Times Newspaper has also been most helpful in the coverage of fires, emergencies and in Fire Prevention Educational articles.

Special thanks to our good friends in the Salvation Army, Volunteers of America and American Red Cross for hot coffee, soft drinks, sandwiches and other refreshments served to our officers and firefighters at serious fires, both day and night.

Thanks to our very efficient N. B. Civil Defense organization, especially the Rescue Truck crew and equipment and Auxiliary Police.

My sincere thanks to all the officers and firefighters of our department for their excellent cooperation to me in our efforts to constantly increase our efficiency and provide a high standard of service to the public that we serve.

RECOMMENDATIONS

I again recommend as I have in the past seven years, the purchase of one new pumping engine. This unit would be placed in Fire Station No. 8, Acushnet Avenue and Davis Street, to replace the present Engine No. 8, a 200 gallon pumper now in service there. The older Engine No. 8 would then be used as a reserve pumper, as the two reserve pumpers presently in use are very old, undependable and in poor condition. One is 33 years old, the other 27 years old.

I recommend the purchase of 4 new automobiles for district chief use. Twelve automobiles of the sedan type are used in the work of our various divisions, there ages being as follows: One—14 years old, one—13 years old, two—12 years old, one—11 years old, two—8 years old, one—7 years old, two—6 years old, one—5 years old and one—4 years old. Due to the age and poor condition of some of these cars, considerable money is being spent on them to keep them operating. This is wasteful and inefficient. Particularly, any cars used in fire responses should be in first class condition and always dependable.

I again recommend for the fifth year, the purchase of some new fire hose to replace old hose which becomes defective from use and age. We do not have sufficient reserve hose on hand to cope with large serious fires, etc.

In our ten fire stations, only four have acquired new "Registers and Take-Up Reels" in the last few years. Six stations are still using registers which are over 40 years old. They are worn and need to be replaced. Errors in alarm transmissions to stations can result, which would result in wrong responses by apparatus, which could be serious. Two new registers each year for the next three years should be the plan to replace these old registers.

One new Fire Alarm Manual Transmitter, which is a very important electrical unit in our Fire Alarm Signal office equipment and which is used to send out all bell alarms to all of our ten fire stations, is in poor condition and should be replaced. It is 45 years old, has been overhauled several times. Serious errors in alarm transmission can result with this old unit.

Several miles of Iron Wire used for fire alarm lines from pole to pole, should be purchased to replace existing old wire that fails from storms, age, etc. Wire also needed to extend lines when new boxes are installed, such as in the Industrial Park and other areas.

I recommend for the seventh year that one apparatus door be widened and an overhead door be installed at Fire Station No. 7 to eliminate a narrow door condition which has resulted in scraping and damaging of apparatus.

I again recommend, as I have annually since 1950, an eleven year period, that steps be taken for the purchase and installation of Master Fire Alarm Boxes and inside Auxiliary Boxes for all public schools presently without such protection. There are six schools, which are the High School, the three junior high schools and the Brooks and Campbell elementary schools which have Master Boxes and Auxiliary Boxes on each floor, so that they do not need to lose time in sounding an alarm as it can be done from within the school. At the end of 1960, there were also 12 additional schools which had Standard boxes only on the school building, but no inside auxiliaries. In these cases, they would have to go to the outside of the building to send in an alarm. This is a total of 18 out of the 31 schools that have a box on the premises. There are still 13 schools without a box on premises and who have to depend on a nearby street corner box to sound an alarm in event of fire in school. The Chicago School disaster, with loss of 95 lives, clearly illustrates the life hazard in schools and that any delays in getting an alarm in to the fire department can mean the loss of lives. I again strongly urge that money be provided and steps be taken without further delay in providing a fire alarm box on those public schools now without boxes and I so record myself.

I again repeat my request, as in previous years, for funds for the purchase of at least 3 portable Walkie-Talkie radios for use at forest fires, large high building fires, factory, warehouses, boats, etc. Most cities and towns have had such equipment for many years. I have not been able to secure same, due to lack of funds.

Some new fire alarm batteries should be replaced each year, their normal life being about 10 years. They are necessary in our fire alarm system and consist of 192 three cell units, costing about $14.00 per unit. Batteries are divided up into circuits and by securing some new ones each year, it is possible in a ten year period to take care of the replacements. They deteriorate due to age and use.

I again recommned an Automobile Power Lift for fire department use in our repair shop, same for use in changing oil, greasing, car repairs, etc.

I recommend that money be provided and consideration be given to the painting of all of our fire stations, both inside and outside, with the exception of the new Station No. 5.

The Building Department employees have done some painting at Fire Station No. 8, Davis Street and at Fire Station No. 10, Cedar Grove Street. Except for that, very little repair work or painting has been done for 20 years. Gutters, conductor pipes, roofs, window frames and sash, etc., are badly in need of attention at certain stations, but without funds being allotted, there is very little that I can do. If $1,000.00 to $2,000.00 were allotted for this work, one station could be gone through each year and much could be accomplished, otherwise, deterioration will continue each year.

Respectfully submitted,

MILTON C. ANDREWS,
Chief of the Fire Department

A FURTHER BREAKDOWN OF THE CLASSIFICATION OF THE FIRES ON THE PREVIOUS PAGE IS LISTED BELOW

Residential	Includes—Dwellings, Tenements, Apartments, Hotels, Rooming and Lodging Houses.
Non-Residential Assembly	Includes—Office Buildings, Theatres, Churches, Hospitals, Institutions, Schools.
Mercantile	Includes—Retail & Wholesale Trade, Rsetaurants, Bars, Repair Shops, Filling Stations.
Manufacturing	Includes—Factories, Breweries, Canneries, Bakeries, Launderies, Printing & Other Manufacturing Processes.
Storage, Etc.	Includes—Warehouses, Piers, Wharves, Grain Elevators, and Storage.
Public Utilities	Includes—Power Plants, Pumping & Transformer Stations, Poles, Etc.
Miscellaneous	Includes—a. Detached Private Garages & Barns. b. All Other Buildings.
Grass & Brush	Includes—Grass and Brush Fires ONLY.
Motor Vehicles	Includes—Motor Vehicle Fires ONLY.
All Other Fires	Includes—Outdoor Fires, Such as Boats, Lumber Yards, and Machinery.
False Alarms	Includes—Mischievous and Maliciously False Alarms.
Accidental Alarms	Includes—Smoke Scares, Honest Mistakes, Wrong Locations, Sprinkler Troubles, and Accidental Alarms.
Emergency Calls	Includes—First-Aid, Accidents, Emergency Calls, Etc.
Out of the City	Includes—Out of the City Calls ONLY.
Deaths	Includes—Death among Firefighters and Civilians.

CAUSES OF FIRES — 1960

1	Anti-freeze boil over
4	Acetylene and Blow-torch carelessness
24	Arcing wire
1	Arson
22	Burning food
3	Burning soot
10	Burning with a permit
33	Burning without a permit
1	Careless use of inflammables
183	Careless smoking
12	Carburetor backfire
2	Careless use of matches
150	Children and matches
7	Combustibles in contact with stoves, etc.
7	Defective and faulty carburetors
3	Defective wiring
5	Hot ashes
5	Exposure
12	Leaking gasoline, oil or kerosene
5	Lightning
2	Overheated brake bands
4	Overheated drying machine

*Leave of Absence

REPORT OF THE AGENT

One of the most far-reaching steps that has ever been taken in the history of the Board of Health was the approval by the Mayor and the City Council for the construction of a public health center at Brooklawn Park and a clinic center in the south end of the city. These facilities are to be constructed under the Hospital Facilities and Construction Act, otherwise known as the Hill-Burton Act. It will mean, for the first time, that this department will have quarters suited to the needs which are peculiar to a health department. It is estimated at this time that these facilities can be constructed and equipped for approximately $600,000.

As a result of this action on November 18, 1960 it became immediately evident that a study should be made for the complete reorganization of the department as well as a revision of the various filing systems that have, like Topsy, grown over the years.

The first step was in the dental division whereby a full-time dentist with two dental hygienists were to conduct work dealing principally with oral examination of the mouths of all children and where defects are found to refer these patients to private dentists. At the beginning, this program covered only the first, third, fifth and seventh grades. It will eventually cover every odd grade through high school each year. This program was instituted with the approval of the New Bedford Dental Society as well as Dr. William D. Wellock, Director of the Division of Dental Health of the Massachusetts Department of Public Health.

Another significant milestone in this department has been the acceptance of the new municipal incinerator which has been under construction for more than a year. This incinerator was accepted by the City of New Bedford on February 4, 1960 after long deliberation as to whether sanitary landfill or incineration should be resorted to.

This department has gone ahead in emphasizing to a greater degree than ever vaccinations of all type but particularly for poliomyelitis. We feel that this is a major step in the right direction toward preventing wide-spread disease in times of disaster and it is in keeping with the Civil Defense objectives at this time.

Communicable diseases during 1960 were reasonably well controlled, there being no significant change in any characteristic from the previous year. While other sections of the country are showing considerable increase in infectious hepatitis only one such case was reported in New Bedford.

In the field of tuberculosis the number of cases dropped from 46 in 1959 to 37 in 1960. While there were eight deaths from this disease in 1959 there were eleven in 1960.

The only other deaths caused by communicable diseases were two reported under syphilis.

The Board of Health wishes to express its thanks to the New Bedford Standard-Times and radio stations WBSM and WNBH for the excellent publicity which these agencies have given the work of the health department.

The Board also wishes to thank the personnel of the department for their cooperation and assistance as well as the Mayor and City Council.

Alphege Landreville,

Agent

ANNUAL REPORT

of

TUBERCULOSIS CLINIC AND MASS X-RAY PROGRAM

TUBERCULOSIS CLINIC ACTIVITIES

	Total	N.B.	Dart.	Fhvn.	Matt.	A.	O.
70 mm. films taken in clinic....	3332	2570	339	203	94	51	75
14 x 17 films (large)	1092	905	41	40	3	19	70
Total number of patients seen at clinic (Mondays)	320	267	15	18	3	17	
Number of patients first seen at clinic (Mondays)	231	183	16	12	2	18	
Active cases of Pulmonary Tuberculosis discovered	6	5		1			
Primary							
Minimal							
Moderately Advanced 4 male, 1 female							
Far Advanced 1 female							
Cases reported to Board of Health	6	5		1			
Number of non-tuberculosis cases seen	211	166	13	12	3	17	
Sputum examinations advised	6	6					
Number of clinics held	67						

MASS SURVEY ACTIVITIES

	Total	N.B.	Dart.	Fhvn.	Matt.	A.	O.
Total number x-rayed	4139	2964	323	365	62	210	215
Recalls for large films (14 x 17)	56	37	8	4	2	5	
Cases of Pulmonary Tuberculosis discovered in these surveys	0						
Cases of non-tuberculosis disease dicovered in mass survey — these include cases of heart disease, cancer, asthma, bronchiectasis, and other less well known diseases	60	44	11	2		2	1

VITAL STATISTICS

Table 20

BIRTH STATISTICS

Live Births in New Bedford (crude)	2729
Non-resident live births in New Bedford	813
Resident Live Births outside New Bedford	39
Live Births corrected for residence	1955
Birth Rate per 1000 population in New Bedford (crude)	27.2
Birth Rate per 1000 population, corrected for residence	19.4
Premature Births corrected for residence	127
Stillbirths in New Bedford (crude)	27
Non-resident stillbirths in New Bedford	9
Stillbirths corrected for residence	18
Stillbirth rate per 1000 total births, in New Bedford (crude)	9.9
Stillbirth rate per 1000 total births, corrected for residence	9.2

Annual Report

New Bedford, Massachusetts
September 5, 1961

To the City Council of the City of New Bedford:

Gentlemen:

I respectfully submit the annual reports of the departments of Inspector of Wires, Street Lights and Police Signal System for the year 1960.

INSPECTOR OF WIRES

During the year, a total of 7,488 inspections were made. Among the larger electrical installations were Our Lady's Chapel, Seven-Up Plant, the Trimount Plastic Plant and the New Era (gear works) Plant in Industrial Park, Fernandes Market and several industrial plant installations. New homes accounted for 101 installations and boarding homes for 18 inspections.

Many homes and factories were left without light and power after Hurricane Donna had passed through this area on September 12. Most of the damage to overhead lines and electrical services on buildings was caused by falling trees. Mr. Daniel Lee was employed as an Assistant Inspector during the emergency. Water damage to electrical systems was not too extensive compared to previous hurricanes.

Mr. Aurele Cournoyer was appointed Assistant Inspector of Wires on October 17, 1960. Mr. Cournoyer was appointed on a provisional basis on September 14, 1959.

The annual Municipal Christmas Display was erected on the Common and from the reports received, the display was a success. The New Bedford Gas & Edison Light Co. again donated the current. The New Bedford Vocational High School faculty and students played a major role to make the display a success. Help was also donated by the Department of Public Works, Park Department, Water Department and the Civil Defense.

The following is a breakdown of the work completed this year:

Notices for inspections	3,127
2W receptacles	4,664
3W receptacles	734
Reinspections	113
Repairs	157
New buildings	101
Old buildings	1
110V motors	126
220V motors	184
550V motors	385
Alterations	79
Sockets	889
Switches	2,692
Oil pumps	32
Oil burners	556
Circulators	321
Permits to electricians	2,699
Permits to owners	56
Oil tanks	11
Fixtures	4,489
Fluorescents	1,171
New services	472
Transformers	69
Service breakdown	52
Elevators	3
Underground services	1
Services reconnected	46

Gas burners	117
Traffic lights	1
Television antennas	28
Red tags	62
Electric ranges	55
Sprinklers	1
Air conditioners	224
Demolitions	55
Medicine cabinets	13
Emergency lights	1
Fire alarm systems	4
Inspections after fires	37
Sump pumps	1
Washers	192
Dryers	104
Dishwashers	8
Deep freezers	5
Kitchen fans	53
Telephone booths	7
Show cases	2
Garbage disposals	10
Timeclocks	3
Carnivals	9
Christmas decorations	5
Water heaters	2
Outside signs	71
Inside signs	24
Meterloops	28
Gas pumps	12
Advisory inspections	148
Floodlights	131
Billboards	3
Church fairs	4
Boarding homes	18
Burglar alarms	1
Thermostats	2
Services reconnected after hurricane	76
Inspections completed	7,488

Reports of defective wiring	1,748
Yellow tags	549
Blue tags	390
Green tags	58
Permits issued to N. B. Gas & Edison Light Co.	2,531

During the year, I investigated and reported to the City Council on 92 petitions of the N. B. Gas & Edison Light Co. and the N. E. Telephone & Telegraph Co. These petitions involved new pole locations, relocations, transfers, wire crossings, underground ducts, removals and a manhole.

Seventeen applications for the moving of buildings were investigated and approved.

The operating expenses for the year were:

General Expenses	$ 2,790.40
Salaries and Wages	26,927.97
Workmen's Compensation	448.00
Pension	2,115.14
Christmas Decorations	5,448.69
TOTALS	$ 37,730.20

POLICE SIGNAL SYSTEM

The worst blizzard in 103 years hit our City on March 4th, with only minor damage to our overhead Police Signal wires and it caused a complete shutdown of the Traffic Signal system.

Hurricane Donna, on September 12th, caused the department considerable work restoring the overhead Police Signal lines which were brought down by falling trees. All police boxes in the areas which had suffered from flood waters in the past were removed before the storm.

I have found, since returning to the Wire Department, that the Police Signal underground wiring system is in a very poor condition. I intend to take immediate steps to replace all defective wires and cables throughout the entire system. To ignore this fact would result in the complete failure of the whole system in the very near future.

Mr. Edward Spencer resigned from the position of Police Signal Electrician on April 18, 1960.

Mr. Robert MacMillen was appointed provisionally by me on May 18, 1960. Mr. MacMillen will hold the position until such time as a list is established by Civil Service.

New traffic signals were installed by the Vander Electrical Co. at North and County Streets and Rockdale Ave. and Hawthorn Street. Vander Electric, the low bidder, quoted a price of $8,800.

A new underground police signal cable was installed under the Airport runways to replace overhead and underground cables that were in the new glide path to the north of the Airport.

The following is a breakdown of the work done this year:

Central Police Station Telephone Switchboard	82 repairs 104 inspections
Weld Street Police Station Telephone Switchboard	58 repairs 136 inspections
Police Boxes	113 repairs 71 inspections
Traffic Lights	283 repairs 94 inspections
Overhead Lines	91 repairs 30 inspections
Underground Cables	50 repairs 25 inspections

The operating expenses for the year were:

General Expenses	$ 17,593.98
Salaries and Wages	11,314.34
TOTALS	$ 28,908.32

STREET LIGHTS

At the end of the year there were 5,554 street lights in operation in the City as follows:

1,888	100 C.P. overhead	@ 14.40 per year
927	250 C.P. overhead	@ 23.88 per year
31	250 C.P. underground	@ 23.88 per year
1,081	250 C.P. underground	@ 31.20 per year
23	400 C.P. overhead	@ 35.28 per year
109	400 C.P. underground	@ 42.72 per year
2	600 C.P. overhead	@ 47.04 per year
59	600 C.P. underground	@ 54.36 per year
2	1,000 C.P. underground	@ 73.08 per year
249	1,000 lumens overhead	@ 28.80 per year

23	17,000 lumens mercury underground	@ 133.20 per year
26	17,000 lumens mercury underground	@ 168.24 per year
8	20,000 lumens mercury underground	@ 129.60 per year
1	20,000 lumens mercury underground	@ 164.64 per year
3	21,000 lumens fluorescent overhead	@ 112.80 per year
174	21,000 lumens fluorescent underground	@ 157.80 per year
6	21,000 lumens fluorescent underground	@ 192.84 per year

New street lights were installed in Industrial Park, Acushnet Ave., north of the junction of Ashley Blvd., South Water St. and on Purchase St., south of Weld St.

Many new lights were installed in the residential sections throughout the City.

It has been a pleasure working with Mayor Lawler on new street lighting programs. His interest in new street lighting has produced results which surpasses any previous city government's record for better street lighting. Our program is abreast of the national trend. It has boosted nighttime shopping and has helped to reduce crime in many areas.

The expenses for the year were as follows:

General Expenses	$ 169,330.77

Due to outages after Hurricane Donna, a credit of $2,240.00 was obtained from the N. B. Gas & Edison Light Co.

Respectfully submitted,

WALTER E. MONT

CITY OF NEW BEDFORD
BOARD OF PARK COMMISSIONERS

December 31, 1960

To the Honorable City Council:

Gentlemen:

The Sixty-seventh Annual Report of the Board of Park Commissioners on Parks, together with reports on Bath Houses, Youth Activities, Playgrounds, and Militia under the control of this Board, is herewith presented in accordance with provisions of law, for the fiscal year ending December 31, 1960.

The Board held ten regular meetings and three special meetings during the year and voted to dispense with meetings during the months of July and August.

The Board organized in May for the ensuing year, elected Mr. Carl R. Anderson as Chairman and Harrie W. Johnston, Secretary. Manuel P. S. Macedo was appointed by the Mayor as a member of the Park Commission for the term expiring May, 1965.

Bids for refreshment concessions were advertised in April and awarded to the highest bidder, namely: Mr. John W. Clauretie, bidding $2,500.00 for Buttonwood Park and Mr. Harold W. Barton, bidding $575.00 for Brooklawn Park.

The request of the Board of Health for a parcel of land in the Brooklawn Park area, bounded by Ashley Boulevard and Brooklawn Street as a site for a proposed Health Center was endorsed and approved. Park Commissioners signed a petition sent to legislature for the land transfer.

The lease running to Mr. Stanley A. Brown for the house and land located at 511 Hathaway Road expired December

31, 1960, and a new lease was drawn up to run concurrent with the Municipal Golf Course lease which expires December 31, 1963.

The New Bedford School Committee was granted a portion of the Hathaway Playground premises for the educational purpose of erecting a school thereon, to replace the burned-out Harrington School. The remaining portion of the Hathaway Playground bounded by Union, Newton, Court and Tremont Streets was retained for use as a playground in accordance with the terms of the donation of the land to the City of New Bedford by Ellen R. Hathaway in 1910, and in accordance with the terms of the bequest to the City of New Bedford by her daughter, Ellen R. Hathaway in 1937. In concurrence with the School Committee the entire area would be known as the "Ellen R. Hathaway School and Playground".

New Bedford Exchange Club was granted the use of Marine Park for the period of August 8th through the 16th, 1960 to sponsor the Third Annual Scallop Festival on 12 - 13 August, 1960.

The American-Lebanese War Veterans' Association of New Bedford, Inc., of 11 Franklin Street, was granted permission to erect a plaque in honor of all American-Lebanese Veterans at the Northern-most part of the island located on Pleasant Street between Pope and Pearl Streets, dividing the eastern and western parts of the Common Park.

The Boy Scouts of America Cachalot Council Inc. was allowed to hold their Golden Jubilee Camporee on parts of Brooklawn Park in the wooded areas bounded by Brooklawn Avenue, Ashley Boulevard, and Irvington Street.

The American-Portuguese War Veterans were granted the use of the lower part of the Joseph Francis Playground, west of Rockdale Avenue for their annual carnival.

The Blessed Sacrament Committee made use of the Riverside Playground for their Annual Feast of the Blessed Sacrament.

The Citizens' July 4th Celebration Committee provided a display of fireworks at the Joseph Francis Playground during the evening of July Fourth.

The New Bedford Symphony Orchestra Association, Inc. made use of Buttonwood and Brooklawn Parks for the purpose of giving two outdoor concerts.

The spirit of harmony and co-operation in the entire department has produced gratifying results. For this, the Board desires to express its appreciation to the officials and employees for their support and many courtesies.

Respectfully submitted,

CARL R. ANDERSON, Chairman
HARRIE W. JOHNSTON, Secretary
WILLIAM SMITH
EVERETT F. SOWLE
MANUEL P. S. MACEDO

December 31, 1960

To the Honorable Board of Park Commissioners:

Gentlemen:

I hereby submit my Annual Report of activities conducted in the Department of Parks for the year 1960.

Due to severely cut appropriations which did not take care of our present park system, it was impractical to improve areas that need constant care and maintenance. Improvements had to be of a type that required little or no cost for continual maintenance and operation.

One of the greatest demands constantly made by the public was more active recreational playfields. In the original planning and construction, our park system met the needs of the city. But with the increasing population and the greater use of our recreational facilities, we find our present areas over-used and inadequate.

Recreation in the Parks is by no means confined to their use of sports. Driving, picnicking, and hiking are equally important. The Department continued to promote the interest of people in the natural features of the Parks.

Tennis was played on all the parks from the middle of March until late in the Fall, and by our present permit system we were able to give everyone an equal chance to play.

The playgrounds were operated from the latter part of June to August with a noticeable increase in participation. The program included free and organized play, competitive sports, handicraft, and many other activities.

A Life Saving Class and Swimming activities were held during July and August. The feature of the season was the annual swimming carnival at the Municipal Beach in August. A full program of races and novelty events to attract interest and to stimulate good fun made the day a happy occasion.

The ice skating season during November through January was very successful. Many more days of skating were available this year than in the past several years.

Repair work was carried out as far as our funds would permit.

The Buttonwood Warming House slate roof was repaired. Walks bordering the zoo at Buttonwood Park were resurfaced and blacktopped. A new backstop and screen was erected on Baseball Diamond No. 2, damaged considerably by a windstorm.

At Hazelwood Park, a chain link fence 1,108 lin-feet long and 10 feet high was installed around the tennis courts.

A new 500 gallon gasoline tank was installed at Brooklawn Park.

Permanent electric service was installed in Marine Park with the total cost of installation borne by the New Bedford Exchange Club. The service became the property of the Park Department.

On the water front of West Rodney French Boulevard concrete ramps and sidewalks were laid and constructed opposite Calumet and Lucas Streets.

Again this year, the New Bedford Vocational High School Automotive Department did the overhauling and repair work on our trucks and tractors, the only expense to the Park Department being for parts.

The bowling greens in the parks at both ends of the city, used by a comparatively small group of citizens, were the most expensive to keep in operation as it meant the services of one man at each park, working on the greens five days a week.

On September 12, 1960, Hurricane Donna swept through the streets and parks demolishing many of our largest and best trees. The roots had been somewhat weakened from continuous rain during the previous days, causing many of the trees to be uprooted.

The following new equipment was purchased during the year:

1	Heavy duty Snow Plow with a 5 and 6 foot V blade.
1	5 foot Rotary mower.
2	Lo-Blo Air Brooms.
1	1960 Chevrolet Station Wagon.
1	Willys Jeep.
1	Sickle bar.
1	Homelite 20" Chain Saw.
1	Tractor.
12	Tennis nets.

I wish to express my thanks to all of the personnel of the department for their continued loyal support, my thanks also to the commissioners for their counsel and advice at all times in administering this department.

Respectfully submitted,
EDWARD W. BARRETT,
Superintendent

BATH HOUSE DIVISION

The swimming season opened on Sunday, June 19, 1960 with twenty guards and other necessary personnel on hand to cover the East and West Beaches.

There was no need to hire emergency guards this year due to the fact that the Civil Service list of qualified guards contained more than we needed. This led to the beaches being manned by qualified personnel and therefore lessening the danger factor on the beaches. All guards were instructed in the use of resuscitator equipment and were given weekly swimming and life saving drills. All personnel were required to have an American Red Cross First Aid certificate.

Swimming lessons were held for New Bedford residents six (6) days a week from July 5th to August 29th under the supervision of Mrs. Genevieve Townley and her two assistants. The range of instruction was from the novice through senior life saving. Exercises were held at the end of the season, at which time Mr. Carl R. Anderson, Chairman of the Board of Park Commissioners and Mr. George Kay, Executive Director of the American Red Cross New Bedford Chapter, presented certificates to those who successfully completed the courses.

This year there was a total of sixteen near-mishaps which involved the direct assistance of guards. These could have been fatal but for the alert guards.

Over two hundred emergency First Aid cases were administered to this year. At this opportunity I would like to commend the New Bedford Police Department for taking the more serious cases to the hospital.

We received a new fourteen foot motor boat which makes putting out and taking in the rafts a more efficient operation.

The Park Department's "Annual Swim Carnival" was held on Sunday, August 21st. Trophies were given to the first three finishers in every event. Mr. Irving Davids of California, noted professional swim coach and trainer, was one of the judges.

The rafts were brought in on September 7th and the beach officially closed on September 10, 1960.

On September 12th, Hurricane Donna arrived, taking three bays off the roof of the bath house and completely destroying Normand's Donut Shop, Inc. Concession Stand on the East Beach.

To Mr. Barrett, office clerks, and Park Department workers, I would like to take this opportunity to express my sincere appreciation for the interest, support and co-operation that I have received throughout the year.

Respectfully submitted,
HERBERT REGO,
(Acting) Head Life Guard and
Bath House Maintenance Man

SWIMMING

The registration period for the swimming program sponsored by the New Bedford Park Department began on June 27th and ended on July 2nd with five hundred (500) pupils enrolling.

Rules regarding the swimming program were posted in the Municipal Bath Houses and also appeared in the local Standard-Times. Students enrolling for swimming instruction had to abide by the following rules:

1. Only children being residents of New Bedford accepted.
2. To register, a child must be six (6) years or older and accompanied by an adult.
3. Pupils enrolled in swimming classes must attend three and one half hours per week on fair days. Roll call was taken.
4. Failure to attend classes and missing three (3) lessons disqualified the pupil from further instruction.

5. Foul weather was the only exception to the above. There was no program on rainy days. No phone calls were to be made to the main bath houses in regards to classes.

6. Swimming examinations were held and certificates were issued to pupils who passed the final test on August 29th, 1960.

The swimming program began on Tuesday, July 5th for eight (8) weeks. Pupils were taught to swim and were classified in different swimming categories such as Beginners, Intermediates, Swimmer, Junior Life-Savers, Advanced Swimmer and Senior Life-Saving.

Pupils were tested and those passing were issued the appropriate certificate.

Total enrollment for July 5th	500
Not attending sessions	20
	480
July 20th — illness, mumps, camp, etc.	48
Total remaining for July 30th	432
Taught to swim and tested	432
Passed Red Cross examination	208
Good in strokes but weak in distance swimming	224

Fourteen participated in Senior Life-Saving refresher course. (Life Guards).

Seventeen Municipal Beach Guards and personnel participated in the Red Cross First-Aid refresher course.

The Annual Water Show was held August 29, 1960 terminating another summer season of teaching children how to swim. Children who participated were those who had passed their swimming tests. They were issued Red Cross certificates and some received Park Department ribbons for perfection in swimming, consisting of first, second and third prizes in all types of swimming from the "Beginner's level through Senior life-saving".

Tiny tots, called "Water Babies", gave an exhibition also. As small as they were, they, too, were taught life-saving by using a towel extended out to their victim and pulling them in through the water to shore. Intermediates performed a life-saving act using the tired swimmers carry. Swimmers also exhibited a wrist grip along with all other swimming strokes. The Junior and Senior Life-Savers performed very well before a large crowd of spectators as well as interested parents.

The Life-Saving classes performed breaks and carriers and also did a boat rescue; they rowed a boat full of water without oars and performed a surf rescue called "a human chain".

Dignitaries attending were: — Mr. Carl R. Anderson, Chairman of the Board of Park Commissioners and Mr. George Kay, Executive Director of the American Red Cross New Bedford Chapter.

Judges for the show were: — Gordon L. Massingham and Robert E. Page, Life Guards.

The announcer was Robert B. Tweedie.

A Banner made for the Park Department by Mrs. Genevieve Townley, Supervisor of Recreational Athletics (Swimming) was presented to the New Bedford Park Department Swimming Program. Mr. Carl R. Anderson received the Banner from Mrs. Townley. This Banner will be flown next season.

The water assistants were Suzanne Caron and Mary Kathleen Brabin.

Respectfully submitted,
MRS. GENEVIEVE TOWNLEY,
Supervisor of Recreational Athletics
(Swimming)

DIVISION OF RECREATION

Playgrounds - Annual Fishing Derby - Youth Activities

The Park Department's Playground season came to a successful close on Friday, August 29th after nine (9) weeks of varied activities and events. A total of 116,127 children used the fourteen (14) playgrounds. The weather co-operated and the first seven weeks were ideal, and all playgrounds and equipment were used to their fullest extent. However, the last two weeks of our season were wet, hot and humid, and many youngsters chose the beach to the playgrounds.

One of the playgrounds, Nashmont, was closed due to lack of attendance, and a new playground which opened proved very successful at the Campbell School on Phillips Road.

All playground equipment was checked before the season opened, and all faulty equipment was repaired. No accidents due to any part of the equipment were reported. The Park Department repair crews were kept busy during the summer checking the equipment.

Many events for the youngsters were held, including contests such as: bubblegum, dolls, costumes, etc.

Arts and Crafts were a very impart program on the playgrounds. The two instructors visited the playgrounds daily and helped with the instructions.

Many of the parks held Display days, where many of the children proudly displayed articles that they had made out of gimp and leather.

On the sports side of the playgrounds, basketball, volleyball, baseball, and horseshoes were the main attractions. Games were played all summer long and leagues were formed. Champs in every division were crowned, and at the end of the season, play-offs for the city titles were held. Many of the teams travelled to Ted Williams' Camp in Lakeville, Massachusetts to play baseball, and in return the Camp played six games at the playgrounds in basketball.

August 16, 1960 was the annual playground day at Lincoln Park and it required fourteen (14) buses to transport the large crowd of children. Lincoln Park gave the Park Department a special rate for the day and everyone had a good time. Free Coca-Cola and ice cream were given out to all who attended. No accidents or lost children marred the day as forty (40) leaders were with the youngsters, to supervise and see that all enjoyed themselves.

For the first time in many years, a New Bedford Citizens' July 4th Celebration Committee was appointed by the Mayor. The Recreation Division of the Park Department was asked to co-operate and an old fashioned day was put on for the children as part of the celebration at the Joseph Francis playground. Games, contests, athletic events, and many other activities made it a very successful day. Balloons, American flags, potato chips, and ice cream were passed out to the hundreds who took part. A team of thirty-five (35) playground leaders helped to make the day a safe and sane one.

Once again, all leaders had to take and pass the American Red Cross first-aid course and as a result of their instruction were able to keep the injuries on the playgrounds minor. As usual there were many skinned elbows and knees and cut fingers.

FISHING AT BUTTONWOOD PARK

With over 1700 fish caught, a very successful season came to a close on Saturday, August 20, 1960. Prizes, including bicycles, for the most fish of the season were again given out through the courtesy of the Touchdown Club of Greater New Bedford and the New Bedford and Acushnet Co-operative Banks. I would like to thank these two donors for their continued support of the Park Department Fishing Derby. Many other prizes from local merchants were also passed out on Derby Day and weekly prizes were supplied by the Park Department.

Each season continues to bring more and more children to the derby and this year 438 were registered.

Safety was continually stressed at the pond and as a result accidents were at a minimum. Many different fish were caught. The largest was a 32 ounce Horn-pout, and a 1/16 ounce Sun-fish was the smallest of the year.

The weather for the season was very good with lots of sunshine and a good time was had by the large groups of young anglers who enjoyed the derby for the ten (10) weeks that it ran.

YOUTH ACTIVITIES — WEST END YOUTH CENTER

Another great season at the Park Department's West End Youth Center, where more than 14,550 youngsters attended in 1960, has come to a close. Most of the attendance came during September through May.

Again, basketball was an important part of our program and the court was continually in use. Leagues were formed and many were entered in various tournaments such as the Boys' Club Annual Tournament and the Dartmouth Youth Activities Tournament.

Pool continued to be very popular with the older groups; and many of the smaller youngsters kept busy at bingo, checkers and other games.

Dancing was very popular among the teen-agers who attended, and during the season several parties were held where dancing was the major entertainment.

The annual Christmas party was held on Friday, December 16, 1960. Two hundred forty (240) youngsters enjoyed the ice cream, candy and soda donated through the courtesy of the Park Department.

Once again several organizations used the Center for their various activities. The Carney Lodge of Elks also had their annual Christmas party at the Center again this year.

In closing, I would like to thank the following for the wonderful co-operation and help that I have received; Mr. Edward W. Barrett, Park Superintendent, Park Commissioners of the Board, office personnel, the Park Keepers, and all Department employees at the various parks.

Respectfully submitted,
JAMES T. BICKER,
Supervisor of Recreational Athletics

RIFLE RANGE

To Mr. Edward W. Barrett,
Superintendent of Parks

Dear Sir:

The year of 1960 again showed an increase of activity and interest by the Military, F.B.I., Police Association and civilians. From April through to July approximately nine hundred (900) persons in scheduled organized classes, were trained and qualified in the use of small arms. These classes were conducted by the H.Q., 1st Howitzer Bn., 211th Artillery, Massachusetts Army National Guard, F. B. I. and Police Schools, and Service Clubs. From August through October, National Guard Rifle and Pistol teams practiced and made ready their small arms for scheduled State Rifle and Pistol Matches. Stony Brook Rod and Gun Club of Providence, R.I., rented the range facilities on Sunday, October 2, 1960.

National Guard Cadets with their officer instructors bivouacked at the range on a three day weekend in July and held classes. Boy Scout troops, on three occasions, with qualified instructors held their classes of qualifications and marksmanship. In addition, up to the present date, three hundred fifty (350) permits have been issued for individual civilian usage of the Rifle Range throughout the year.

Rifle Range rehabilitation is about sixty percent complete, but the safety factors and valuation of the range property have increased outstandingly. Work accomplished at the Rifle Range in 1960 was as follows:

Bullet impact area was scraped, graded and raked, to facilitate better drainage and power mowing of terrain.

Vehicle roads on range property were scraped and leveled.

Road to 1000 yd. butts was reopened and cleaned of brush growth for fire stop and access for fire trucks.

Gate posts and signs were installed at driveway entrance to range.

Galley washrack at rear of range house was rebuilt and painted.

Target racks, frameworks, benches and structures were repainted for preservation.

Erosion of firing point slope was corrected by land fill and grass seeding.

Range house roof leaks were patched.

Range house kitchen was washed and repainted.

Regular mowing of grass and general cleaning of area per usual.

I would also like to express my appreciation for the cooperation and interest shown by you and your Department employees in the maintenance of the Rifle Range.

Respectfully submitted,

ARTHUR LEE, SMC, USN, Retired
Range Control Officer

ANNUAL REPORT
DEPARTMENT OF PARKS
of the City of New Bedford, Massachusetts
for the year ending December 31, 1960

IN CITY COUNCIL,

April 27, 1961

Received, placed on file and ordered printed in the City Documents.

CHARLES W. DEASY,
City Clerk

Attest:

CHARLES W. DEASY,
City Clerk

Annual Report

of the

CHIEF OF POLICE

of the

CITY OF NEW BEDFORD

Massachusetts

For the year ending December 31, 1960

ANNUAL REPORT OF THE CHIEF OF POLICE

CITY OF NEW BEDFORD, MASSACHUSETTS

January 1, 1961

To the Honorable Francis J. Lawler, Mayor, and the
City Councillors of the City of New Bedford.

Gentlemen:

Herewith is submitted the Annual Report of the condition and doings of the Police Department for the year 1960.

On December 31, 1960 the department consisted of:

Acting Chief of Police	1	Matrons	3
Acting Deputy Chief	1	Part-time Matrons	2

REPORT OF THE POLICEWOMEN

Cases investigated	429
Conferences	1954
Girls reporting for supervision	233
Home conditions investigated	9
Homes visited regarding wayward, stubborn, or neglected children, and consulting with their parents	45
Warrants served	23
Arrests made with warrants	19
Accompanying girls to doctor for physical examination	16
Summons served	1
Capias served	1
Insane warrants served	1
Missing persons reported to this division	11

Affidavits taken for this department	20
Trips out of this city to return prisoners	5
Accompanying women to Massachusetts Correctional Institutions	30
Accompanying women to Taunton State Hospital	31
Extra hours of duty	200

There has been service in the various stores throughout the city during rush periods in the daytime; also evenings during the Holiday Season.

Criminal, Juvenile and Superior Court sessions have been attended. Various cafes and restaurants have been visited during the night hours. Policewomen's conferences have been attended. There have been meetings with various social agency groups and talks have been given before churches, schools and civic groups.

We have assisted the detective division, vice squad, juvenile bureau and the uniform branch of the department in the investigation of cases and have assisted the Courts in matters pertaining to female prisoners.

Respectfully,

ALICE W. DUPUIS,
Sergeant of Policewomen

REPORT OF THE SPECIAL INVESTIGATING UNIT

REMARKS AND RECOMMENDATIONS

In September 1960, a new Radio Base Station was installed in the Police Department, thus modernizing our Police Radio Service and placing it on a par with the Police Radio Service given by other cities and towns of the Commonwealth.

During the year 1960, the Police Matrons started to work on a forty hour week basis.

On the 8th of August 1960, a new Ambulance was presented the Police Department as a gift from the Henry H. Crapo Charitable Foundation, which is now in use at Police Headquarters.

Our police Ambulance at Police Station No. 5 has been in service since 1951 and is badly in need of replacement, therefore I recommend the purchase of a new ambulance for use at that Station.

I also recommend the purchase of eight new automobiles for Patrol Service.

In conclusion, I take this opportunity to thank His Honor, the Mayor, the City Government, all departments within the City Government, the Radio, the Press, and the general public for the fine support and cooperation given to this department during the year 1960.

Joseph A. Sciuto, M. D.
Board Members

Leo S. Harrington
Director of Public Assistance

To His Honor, the Mayor, and Members of the City Government of the City of New Bedford:

The Board of Public Welfare respectfully submits its annual report for the year 1960.

Gross expenditures for all categories of assistance administered by this department totalled $5,330,923.44, an increase of $69,720.98 over the amount expended in 1959. Gross reimbursements, from all sources, amounted to $4,336,147.23, leaving a net cost to the City of $994,776.21, which was an increase of $9,190.95 over that for 1959.

In common with other communities throughout the nation and the Commonwealth, rising costs of medications and hospitalization are reflected in the increasing expenditures of this department. The total expenditure in 1960 for medical care in all categories was $1,421,136.41, an increase of $111,352.92 over the amount expended in 1959. Effective as of January 1, 1960, new all-inclusive per diem hospital rates were certified by the Commissioner on Administration, as were approved schedules of rates for public medical institutions and institutions under the State Department of Public Health.

As of August 1, 1960, a uniform state-wide drug price plan, applicable in every community except Boston, was put into effect by the State Department of Public Welfare. This included a formula by which prescribed medication is to be paid to the local retail druggists, and a chart for determining prices for broken containers. One of the factors adding to the costs of prescriptions is the broken container, and a letter was sent from this department to each physician, requesting that insofar as possible he attempt to prescribe for his patients in amounts comparable to the original container, rather than prescribing quantities of refills which, when totalled, would equal the amount in the original container. This would eliminate the expense of the broken package or bottle.

As of July 1, 1960, payments for the three Social Security categories of Old Age Assistance, Aid to Dependent Children and Disability Assistance were revised to reflect an increase in the cost of living index as reported by the Division on the Necessaries of Life. The cost of living index showed an increase of 5.2% for the period July 1957 to May 1960. In order to effect this change, it was necessary to revise each budget affected, by substituting for the 25.7% increase then in effect, a 30.9% adjustment.

On September 26, 1960, a notification was received to the effect that the Governor had submitted a special message to the General Court urging establishment of Medical Assistance for the Aged legislation to take advantage of the 1960 amendments to the Social Security Law.

On October 1, 1960, the federal matching formula for Old Age Assistance was increased from $41.50 per case to $47.50 per case.

On November 25, 1960, we were informed that the new program of "Medical Assistance for the Aged" had been enacted, retroactive to October 1, 1960. In order for a person to be eligible for this new program, he must be 65 years of age or over, and in need of assistance to meet the cost of his medical needs.

The new program is an extension of the Old Age Assistance program. It prohibits the granting of Old Age Assistance in nursing homes, chronic hospitals and public medical institutions where the patient has no need of another residence. One of the immediate effects of this new law was to transfer to the new program all recipients of Old Age Assistance who were patients in licensed nursing homes, chronic hospitals and public medical institutions.

Under this law, there is no specific period of residence required as long as the person occupies an established place of abode with no present intention of definite and early removal, but not necessarily to remain permanently at this residence; however, persons coming into the State for the sole purpose of receiving medical or institutional care are ineligible for Medical Assistance for the Aged.

Personal property exemptions are $2,000.00 for a single person in ownership of bank deposits, securities, cash on hand or similar assets. This same exemption applies for a married person if it is the husband who is the applicant. There is a $3,000.00 exemption allowed in combined ownership of personal property between husband and wife if the wife is the applicant. Cash surrender value of insurance is not considered in the computation of personal assets.

Income exemptions are as follows:

A single person has an exemption of $150.00 a month when receiving medical care in his own home. He is not required to use any part of his monthly income of $150.00 for medical care.

For a married person, when the applicant is the husband, he is allowed an exemption of $150.00 of his monthly income. When the applicant is the wife, the exempted income is the combined monthly income of the husband and wife up to $225.00, and no part of this is to be applied to the cost of her medical care.

If a recipient of Medical Assistance for the Aged is confined to a nursing home, chronic hospital or public medical institution, and has no income, or income of less than $15.00 a month, he shall be paid an amount equal to $15.00 for his personal needs.

Children are liable to contribute toward the support of their parents who are receiving aid. Liberal exemptions are given and unusual circumstances are taken into consideration before a determination is made of the amount the child is legally obligated to contribute.

Ownership of real estate by an applicant or a recipient who resides thereon, or who is residing elsewhere because of a physical or mental incapacity, does not disqualify a person from receiving aid under this new program; however, ownership of any interest in any other real estate does disqualify an applicant for this type of assistance. Unlike Old Age Assistance, no lien shall be taken on the property of a recipient of aid under this program.

The Federal Government participates to the extent of 50% for all monies expended for medical assistance, and 50% of the costs of administration of this program. After deduction of the Federal participation, the State reimburses for two-thirds of the medical assistance payments and for one-half of the remainder for administration. There is no Federal participation in the amount expended for personal needs; however, the State reimburses for two-thirds of this expense, with the City paying the balance.

As the year 1960 ended, rules and regulations regarding the administration of this new program had not been formulated by the State Department of Public Welfare, and the local communities were administering the program to the best of their abilities based upon experience gleaned from administration of the other welfare programs.

Effective as of October 1, 1960, the State began participation in the cost of administering the programs of Old Age Assistance and Aid to Dependent Children. The State has been sharing in the cost of administering the program of Disability Assistance since its inception, to the extent of one-fourth of the administrative costs, and this same reimbursement formula is now extended to the Old Age Assistance and Aid to Dependent Children programs, as well as being incorporated into the Medical Assistance for the Aged program.

We wish to extend our appreciation to: The Honorable Mayor and Members of the City Council, Heads of all other City Departments, Mr. James A. Donnelly, District Director of the Massachusetts Department of Public Welfare and his staff, members of the staff of this department, and to the many private agencies, businesses and individuals, for their co-operation and assistance given to this department throughout the year.

Respectfully submitted,

LEO S. HARRINGTON

Director of Public Assistance

Annual Report

OF THE

CITY PURCHASING DEPARTMENT

CITY OF NEW BEDFORD

MASSACHUSETTS

For the Year 1960

THE BAKER MANUFACTURING COMPANY
- PRINTERS -
NEW BEDFORD, MASSACHUSETTS

December 31, 1960

The Honorable Mayor and City Council
City of New Bedford
New Bedford, Massachusetts

Gentlemen:

We have the pleasure of submitting to you our report for year 1960.

We are grateful for your continued support and cooperation in our efforts to conduct all purchasing activities in accordance with the laws and ordinances of the City and we have continued to work closely with all of the City departments to effect for them every saving possible.

Our policy has been to give equal opportunity to all qualified bidders and to obtain for the City the most economical supplies available, stressing quality and fair competitive relations.

Respectfully submitted,

ALBERT E. CATTERALL

Purchasing Agent

CITY OF NEW BEDFORD, MASSACHUSETTS
PURCHASING DEPARTMENT

REPORT OF THE PURCHASING DEPARTMENT — 1960

The work of the Purchasing Department during 1960, the fourth full year of its operation, is summarized in the schedules of Requisitions, Purchase Orders, and Contracts listed on the following pages.

Efforts have been made to spread the work load by negotiating during the early months of the year for future delivery contracts for Public Works and Water Department supplies and for items in general use such as Tires & Tubes, Non-Perishable Food & Milk for the School Cafeterias, etc.

The City Ordinance provides that the Purchasing Department is responsible for procurement of all supplies and contractual services required by any department which derives its support wholly or in part from City funds, with the exception of professional expert consultant or similar contractual services. The Department is also responsible for the disposal of all surplus scrap and unusable materials.

The operating expense for 1960 follows:

Salaries and Wages	$14,687.09
General Expenses	1,785.14
	$16,472.23

The Purchasing Agent is often consulted on procedure, sources of supply, determination of awards, etc. by departments concerned and reviews all recommendations for contract awards before submitting to the Mayor for approval.

Since the start of the Purchasing Department purchases of items involving $10.00 or more have been made by the Purchasing Department in the usual manner.

The major accomplishment of the Purchasing Department has been the establishment of a procedure under which procurement has been handled in accordance with the provisions of the Ordinances of the City, thus protecting the City from such irregularities as deliveries being made without written orders, orders written from invoices, purchases divided to avoid preparing contracts, and accounts encumbered after commitments had been made.

The trend of commodity prices has continued to increase. Notwithstanding this trend, there have been many purchases for the City at prices lower than had been paid for the same items during the previous year.

Few cash discounts had been taken prior to 1957. It has been the practice of the Purchasing Department to arrange for cash discounts whenever possible, and there is record of over 400 Sellers who regularly allow cash discounts on purchases made by the City. The City Auditor and the Department Heads are fully aware of the advisability of taking cash discounts, and through their cooperation the total of cash discounts earned and taken during 1960 is enough to pay the operating expenses of the Purchasing Department.

The City is exempted by law from payment of Federal Excise Taxes and it has been the policy of the Purchasing Department to provide exemption certificates to cover such taxes where taxes may have been paid previously. Purchases of motor passenger cars, motor trucks, and other automotive equipment are covered by exemption certificates.

CONTRACTS

Formal Contracts are required to authorize purchases of $500. or more and 167 such contracts were written during 1960. Contracts are drawn up by the individual department heads and mailed out for the Contractor's signature after which they are returned to the Purchasing Department and processed.

Much progress has been made during 1960 in expediting processing of contract documents but the interval from award to execution approximates ten days and efforts will continue to reduce this interval.

No work is permitted until contract and bond have been approved by the City Solicitor and signed by the Mayor.

Many contracts were issued for future delivery on an established price basis of supplies used by various departments, resulting in uniform quality and minimum cost. Such contracts are based on total requirements with no guarantee of quantity.

When inviting bids on contract purchases and on purchases under $500. efforts have been made to include all known concerns in New Bedford who are in a position to submit bids, and many contracts and purchase orders have been awarded to New Bedford business companies.

SAVINGS

There appears to be no yardstick by which over-all savings through centralized purchasing can be accurately determined. Certain definite savings over prices previously paid under similar market conditions, or prices known to be under the prevailing market, have been recorded and details are available from the Purchasing Department files. Because of the varied types of work covered by construction contracts, there is no definite basis for comparison of costs, but the wide circulation given to Invitation to Bid has undoubtedly resulted in substantial savings to the City.

Voted: That the Secretary be directed to prepare and edit the annual report of the School Committee for the year 1960 and that six hundred copies of the same be printed.

The following report for the year 1960 is respectfully submitted:

RUTH B. McFADDEN
Superintendent of Schools

Office of

Superintendent of Schools

New Bedford, Mass.

December 23, 1960

Honorable School Committee
New Bedford, Massachusetts

Mrs. Ferreira and Gentlemen:

In accordance with the provisions of the Rules and Regulations of the New Bedford School Committee, I have the honor to submit the one hundredth annual report of the Superintendent of Schools and my sixth annual report as Superintendent.

Accompanying this report and appended hereto are progress reports submitted by the two assistant superintendents, and the senior high school principal.

ACQUISITION OF LAND FOR FUTURE SCHOOL CONSTRUCTION — CLARK'S POINT

Upon receipt of a communication from the Secretary of the School Committee inquiring as to the status of the matter of reserving land at Clark's Point for future school construction, the City Council at its meeting held January 14, 1960, adopted the following recommendation:

> " . . . . That the Mayor be requested to have the Engineering Division of the Department of Public Works set aside ten (10) acres of land on the east side of Brock Avenue, to be reserved for school purposes until such time as a school is constructed thereon."

Mayor Lawler immediately requested the Engineering Department to reserve the above-mentioned land for future school construction.

GRACE ESTATE

On March 22, by request of Mayor Lawler, a special joint meeting of the School Committee and the City Council was called for the purpose of discussing the acquisition of additional property for future school construction.

Before the meeting was concluded, the School Committee instructed the Superintendent to write a letter to the Mayor, requesting that the City acquire the property known as the Grace estate east of the Parker Street School, bounded by Pope, County, and Parker Streets, for the purpose of erecting a new elementary school to replace the Merrimac Street, the Parker Street, and the Cedar Street Schools, all over one hundred years old.

The City Council, in regular session, on March 24, 1960, approved the acquisition of this property, voting unanimously to authorize the Mayor to initiate action for a new school in the area.

On May 20, 1960, the heirs of the Grace estate, through their attorneys, and Mayor Lawler reached an agreement for the transfer of the property to the City for its assessed valuation plus twenty-five percent. A provision of the agreement is that the property be used only for the construction of a school building.

It is anticipated that the transaction will be consummated shortly.

HATHAWAY PLAYGROUND

When negotiations were initiated to replace the Harrington Memorial School, which was destroyed by fire on May 28, 1960, the Massachusetts Building Assistance Commission Administrator suggested that a legal opinion be sought as to the possibility of acquiring the Hathaway Playground property for the erection of a new school, since that would be a far more desirable site than the original one.

Through the earnest efforts and the admirable cooperation of the City Solicitor, the School Committee, the Park Board, and the heirs to the Hathaway estate, a suitable portion of the Hathaway Playground was acquired by the New Bedford Public Schools for educational purposes.

In accordance with the request of the Park Board and the terms of the original bequests of Mrs. Ellen R. Hathaway and her daughter, Miss Ellen R. Hathaway, the school building to be constructed shall contain toilet and storage facilities with outside access, to be used in connection with the continued operation of the Harrington Playground; a suitable shelter shall be provided for mothers and babies; and the property fence, with gates, shall be retained.

The School Committee shall have control and custody of the school building, and the Park Board shall retain control and custody of the remaining portion of the property for use as a playground, the entire area to be known as the Ellen R. Hathaway School and Playground.

The use of the property having been secured, the School Committee requested Mayor Lawler to provide architectural services in preparation for construction of the new school building, which His Honor promptly provided through the firm of Tallman, LaBrode, Drake and Underwood.

Final plans and educational specifications, with tentative estimates of cost, have been forwarded to the Administrator of the School Building Assistance Commission for approval.

Upon final approval and formal acceptance of the plans by the School Committee, the matter of financing the construction will be referred to the Mayor and the City Council.

It is anticipated the proposed 16-room Ellen R. Hathaway School will be ready for occupancy in September, 1962.

PUPIL PERSONNEL TRANSFERS

In 1960 a series of unusual situations caused the transfer of certain pupils from one school building to another.

The destruction of the Harrington Memorial School by fire on May 28, 1960, necessitated the re-opening of the Thompson

Street School which, by vote of the City Council on July 14, 1960, and with the approval of the Mayor on July 19, 1960, was returned to the jurisdiction of the New Bedford School Department.

The teaching personnel and the parents involved were notified that the former Harrington School pupils would be accommodated at the Thompson Street School as of September, 1960, and would remain there until their new school would be ready for occupancy, probably in September, 1962.

Another transfer of pupils was brought about by the closing of the 105-year-old Dartmouth Street School, as an economy measure. Its eighty-five pupils were distributed among nearby schools. In August, 1960, the School Committee relinquished custody of the building, submitting it to the City for disposal.

A third transfer of pupils was necessitated by the closing of Sol-e-Mar Hospital. The Health Day Class formerly conducted at Sol-e-Mar was moved to the Elwyn G. Campbell School in September, 1960; and the hospital students were transferred to St. Luke's Hospital, where Mrs. Lillian Egan, teacher of these pupils, is at present giving instruction in temporary quarters. Her services have been expanded to include some Lumbard Ward patients whose stay is rather protracted.

NATIONAL DEFENSE EDUCATION ACT
TITLE III

In 1960, as in 1959, the New Bedford School Department took full advantage of federal funds made available through the National Defense Education Act of 1958 for the improvement of facilities in the fields of science, mathematics, and modern foreign languages. Reimbursements totaling over thirty-nine thousand dollars have been received during the past two years.

In 1959 the total allotment of $19,570.12 was used for the renovation and the construction of science laboratories at New Bedford High School, and in 1960 an almost equal amount was used to construct and equip the new modern foreign language laboratory at New Bedford High School, and to purchase the best and most modern equipment available for the science, mathematics, and modern foreign language departments throughout the system. This year's reimbursement was earned because other school systems had not fully utilized available funds.

In an editorial in the Boston Globe on October 17, 1960, New Bedford, among nine other communities in the Commonwealth, was commended for taking advantage of the full allotment offered through the N. D. E. A. "Those communities," the editorial states, "which have managed their full allotments and more deserve the commendation of all friends of education."

MODERN LANGUAGE LABORATORY

The Modern Language Laboratory has been in operation since September, 1960.

The Director of Audio-Visual Education has reported: "As is the case with most devices that make learning more effective, the teacher involved works much harder than without such devices. Our high school language teachers spend many hours making and re-making tapes. The students' acceptance of this laboratory, and their desire to spend extra time listening and recording is recompense that makes the instructors' work worthwhile. Four months is a very short time, and evaluation is not possible at this time, but several reports of individual improvement have come to us, and we are sure that more will be on the way. Language teaching probably will change even more in the sixties because of the obvious need for increased language proficiency. With this in mind, we have placed temporary 'listening posts' in all junior high school language classes."

FIELD TRIPS

In order to take advantage of local and nearby resources, the Audio-Visual Department, under the direction of Miss Margaret M. Jackson, has arranged transportation for innumerable field trips this year for the benefit of the pupils of the New Bedford Public Schools.

Out-of-town trips included visits to Boston and Fall River hospitals, Worcester State College, Museum of Science and Museum of Fine Arts in Boston, Plimouth Plantation, and Dartmouth Children's Museum.

Among the places of local interest visited were St. Luke's Hospital, Bourne Whaling Museum, our Civic Center, dairy farms, manufacturing plants, libraries, bakeries, and super markets.

Bus trips were scheduled also to transport students to the locally sponsored Science Enrichment Program classes, held this year in Dartmouth and Fairhaven.

MAINTENANCE

The major repairs accomplished by the Maintenance Department for the calendar year 1960 were as follows:

I. *Carpentry* —
    A. Installation of:
        1. Modern Language Laboratory at the Senior High School.
        2. Several classroom floors at Lincoln, Phillips Avenue, DeValles, and Roosevelt Junior High Schools.
    B. Construction of:
        1. Twelve science cabinets
        2. One hundred tack and bulletin boards
        3. Many bookcases to fit under classroom windows
        4. Cabinets to store band instruments at Normandin Junior High School
    C. Repairs to:
        1. Auditorium chairs at the Senior High and Normandin Junior High Schools.

    2. One asphalt corridor floor at Keith Junior High School.
    3. Locks, lockers, doors, door checks, and windows in various schools.
    4. Gutters on several schools.
  D. Refinishing of:
    1. Furniture salvaged from the Harrington School fire.
    2. Eight hundred desks at the Senior High School and two hundred desks in other schools.

II. *Plumbing* –
  A. Replacement of:
    1. Several bubblers.
    2. Copper tanks.
  B. Repairs to:
    1. Cafeteria steam tables, drains, and equipment
    2. Numerous bubblers.

III. *Electrical* –
  A. Installation of:
    1. Inter-communication system at Normandin Junior High School.
    2. Lighting fixtures in many schools.
  B. Repairs to:
    1. Clock motors
    2. Electric fixtures
    3. Telephones
    4. Workshop equipment
    5. Cafeteria equipment

IV. *Painting* –
  A. Exterior:
    1. Ashley, Phillips Avneue, Winslow, and Thompson Street Schools
    2. Doors at same schools

    3. Broken glass replaced in several schools at an estimated cost of $5,000.00

  B. Interior:
    1. High School — 8 classrooms
    2. Roosevelt — 8 classrooms
    3. Hannigan — all classrooms
    4. Several rooms in other schools

V. *Heating and Ventilating* —

  A. Installation of:
    1. Oil burners, steam traps, and incinerators in the Dunbar, Acushnet Avenue, and Greene Schools
    2. Air filters in Brooks, Campbell, and Keith Junior High Schools
    3. Steam traps, steam return lines, and grates in several schools

  B. Repairs to one hundred thermostats

VI. *Playground Installations* —

  A. Chain link fences at Congdon, Taylor, and Greene Schools.

  B. Blacktop at several schools.

RECOMMENDATIONS

I. *Educational* —

  A. Strengthen the educational program, on all grade levels, through continuous evaluation of the curricula.

  B. Microfilm all permanent school records.

II. *Maintenance* —

  A. Install an inter-communication system in the Roosevelt Junior High School.

  B. Continue to:
    1. Install oil burners in at least three schools each year

2. Blacktop playground areas
3. Replace pupils' desks and chairs with movable furniture
4. Replace worn classroom and corridor floors
5. Paint exterior window frames
6. Paint classroom and corridor walls
7. Erect chain link fences around playgrounds
8. Install modern lighting equipment where present fixtures are inadequate.

Building renovations are costly but essential. Through the untiring efforts of the Maintenance Department, we are expending wisely the money allocated in the budget for school modernization.

SECONDARY EDUCATION

Dr. James R. Hayden, Assistant Superintendent of Schools
Department of Secondary Schools

This has been a year of accomplishment. Several curriculum and policy changes have been effected which have and will continue to bring benefits to the students in our schools. Of primary importance is the work accomplished by the teachers, led by their department heads and principals. Ultimately, the test of a new program is whether or not it will work in the classroom. Hence, here are the accomplishments prompted or planned or participated in, by or for the key figure, the classroom teacher.

Accomplishments on the Senior High School level:

1. *Minimum requirements for graduation* were raised. As of June 1961, a diploma will be awarded only if the student has successfully completed four years of English, one year of American History and acquired 80 credits. Previously 80 credits was the only requirement.

2. *Three-year program in typewriting* is offered as of September 1960 to all Business Education students starting in Grade 10. With typing fundamentals mastered before the study of shorthand is undertaken, a higher level of skill in both typing and shorthand is expected from our graduates.

3. *The English curriculum* of the college preparatory divisions was reorganized so that Grade 10 will emphasize American Literature, Grade 11 will treat World Literature and Grade 12 will concern itself with the study of English Literature.

4. *The study of the Portuguese Language* was changed from a two-year elective to a four-year program. A survey of 88 colleges revealed that seven would not accept Portuguese as fulfilling their modern language entrance requirements. However, 25 gave a qualified "yes" and the remainder indicated their acceptance. After results were made known to parents and students and with the realization that this language is on the

"critical" list of the U. S. Office of Education, the four-year sequence was recommended and adopted.

5. *Driver education program* was changed from full-participation to limited-participation with the senior high school offering only the academic part of the program. In previous years with two full-time instructors and two automobiles we have certified approximately 120 students per school year. Under this new program, we will be able to process between 250-300 students with but one instructor. After students obtain their academic training with us, they will obtain their behind-the-wheel instruction at their own expense from commercial driving schools.

Accomplishments on the Junior High School level:

1. *Grouping incoming students* on the basis of reading ability has taken place with successful results for the second year. Teacher recommendation, guidance counselor recommendation and 6th grade achievement have been factors used in addition to the primary factor, the reading level as established at the end of Grade 6.

2. *Special progress classes* have been organized in mathematics and English. These students will be accelerated and enriched in subject matter, but will not "skip" any grades. When they reach Grade 12, the advanced work they may then accomplish will probably allow for advanced placement in college.

3. *Minimum essentials classes* are now available to accommodate the Grade 7 or 8 pupil who is retarded two or more years, may have an emotional problem, is a disciplinary problem and a potential drop-out. More individualized attention, diagnosing his academic deficiencies and planning a program especially suited to him are the major features of this organization.

4. *"Explorations in Science"* is the name of a class organized for the Grade 9 college preparatory student who has no science in his schedule and has high ability and interest. The content is still fluid, but the emphasis is on the develop-

ment of the laboratory and the inductive approach to scientific problems.

5. *During "Open House"* a parent visiting a secondary school may wish to see five or ten different teachers, and a teacher is faced with the problem of interviewing from 150 to 200 parents. In 1959 Keith Junior High School scheduled a sample day's program. The results were so successful that Normandin Junior High School adopted it this year and it is expected that next year it will become standard for all junior high schools.

6. *Minimum requirements for promotion* have been raised. In the past, a clear promotion has been given if a student failed one major subject. Now, a single failure will mean a trial promotion. Also if a student fails English or arithmetic for the second consecutive year not only will the trial promotion be given in unusual cases but the student will definitely be returned to the previous grade at the end of 20 weeks if failure continues.

7. *Keysort methods* now used to group pupils entering Grade 7 saved many hours of tedious clerical work usually expended during summer months by principals. Attendance records are being maintained by this method at one junior high school this year and plans are being formulated for adoption in other schools. Grouping by curricula and elective choices in Grades 9 and 10 are also planned. Essentially, the method consists of punching the required data by codes into holes around the edge of a card. The cards can be sorted by a long needle quickly and in as many ways as there are holes. No machines and a minimum of training time makes for a fast, economical method of handling many clerical tasks.

Accomplishments Involving both Junior and Senior High levels:

1. *Remedial and developmental work in reading.* — The raising of minimum requirements for promotion and graduation are most desirable. However, an accompanying responsibility that cannot be denied is the provision of the opportunity to do

remedial work with those who have difficulty meeting the higher standards. At both the senior and junior high school levels, remedial teachers have been appointed to diagnose and help students reading below grade level. As the program allows, other students reading at grade level but not well enough for their capabilities are enrolled and helped to develop their skills. A reading consultant, Dr. Jeremy Brown, has been engaged on a part-time basis and is working not only with these remedial teachers but all teachers of English. A developmental reading program for Grades 7 and 8 for all students is envisaged for September 1962.

2. *Guide for substitute teachers.* — Working with the four principals of the secondary schools, a "Guide for Substitute Teachers in the Secondary Schools" was published this year. While no set of rules will take the place of good judgment, these practical suggestions of how to conduct the program, before, during and after the scheduled hours, have served to make the temporary teacher more valuable from the first day on the job.

3. *American heritage.* — A teachers' guide to the "Study of the True Facts of Communism" was placed in the hands of each teacher of social studies in Grades 7 - 9. Compiled under the direction of Mr. Bergstrom, Department Head, it is intended to help the teacher present the contrast between Democracy and Communism. Plans are being formulated for a similar guide designed for Grades 10 - 12. Many school systems have designed units to study the nature of Communism in each class of history or geography over a six year period. This plan has received considerable attention. This assistant superintendent has been invited to speak at the National Military-Industrial Conference in Chicago next April. Local and area service and social clubs have requested and received the illustrated lectures which were used to initiate the program in the schools. The local school system has been nominated as one which might be selected to receive a Valley Forge Freedom Foundation Award. Credit must go to the teachers in all grades from kindergarten through senior high school for their

continuing, constructive programs designed to make expert citizens at a time when "expertness" is being demanded in so many fields.

PUPIL PERSONNEL SERVICES

Organized in 1956, for the purpose of integrating the services of specialists who work in our schools, this assistant superintendent still retains directorship. Its increasing scope and vital activities can be seen by listing the accomplishments of the past year.

1. *Elementary School Adjustment Counselors.* — Under a program endorsed by the Massachusetts Department of Education and the Youth Service Bureau, two school adjustment counselors were engaged this year to work with children in Grades K through 6. Although the program has been organized locally but three months, all who have had contact with the service have been enthusiastic. One counselor comes to us with 15 years experience and the other with 5 years experience. This experience is distributed not only in the various areas of social work but in public school work as well. Their work is directed toward helping the child whose emotional problems are preventing him from achieving in his regular school work. A more detailed report will be available next year.

2. *Cumulative Record Revised.* — A major revision in the cumulative record used with all children from kindergarten through Grade 12 has been effected. In addition to changes in manner and type of information recorded, each cumulative record carries a complete set of directions printed on the back of the folder. This should insure a higher degree of standardization and accuracy.

3. *Careers on tape.* — Through the cooperation of our guidance counselors, WNBH and Northeastern University, a half-hour weekly radio program called "Facing the Facts About Careers" has been initiated. Area guidance personnel were invited and have participated. Current, pertinent information on such questions as "How to Finance a College Education",

"How to Choose a College", plus up-to-date occupational information is now broadcast weekly for both parents and students in Greater New Bedford.

4. *Guidance in the junior high school.* — Group guidance classes were changed on a trial basis at one junior high school this September so as to include the Grade 7 pupils for the first ten weeks and then concentrate on the Grade 8 pupils for the remainder of the year. This was done on the basis that the incoming pupils need considerable help orientating not only to a new school but to an entirely new type of schedule. Present plans are to extend this type of organization to all junior high schools next year.

5. *Guidance in the senior high school.* — By the addition of a fifth counselor, the NDEA required ration of 1 to 500 was attained. This year's grant is $1,305.60, or 60c per student. Space and the ever increasing clerical load are the major problems in this area. An increasing number of college bound students and their tendency toward multiple applications are the causes for the clerical load. The space problem is shared with several other departments.

6. *In audiometry and lip reading* areas, the two specialists tested 12,313 children, 215 were seen by physicians as a result of failing the final test. Fifteen pupils are given training in lip reading techniques and the use of hearing aids.

7. *Remedial reading* specialists received approximately 300 referrals, 216 of which were carried as active cases, 32% of which were in Grade 4 and 23% in Grade 3. About 47% were discharged because after a year's work they were able to read at grade level. The resignation of one of the three assigned specialists has left a vacancy in this area which still remains. Hence, the program in the coming year is being reduced accordingly.

8. *Speech therapy* not associated with a hearing loss is carried on by two specialists. Over 1,000 kindergarten children are screened annually, 693 referrals were received from principals, teachers and other personnel. Some 466 children

received treatment during the year, with 30% discharged. Parent interviews and group instruction in Grade 1 play an important part in this program.

9. *Educational and psychological evaluation* is a continuing program with city-wide achievement and/or aptitude tests given to 1,155 kindergarten children, 1,223 pupils in Grade 3, 1,142 in Grade 6, 1,206 in Grade 8 and 1,960 in the senior high school. The administration and scoring of end-of-year tests, evaluating transfer students, evaluation of pupils with special problems, clinic referrals, interpretation of test results and the completion of the First Academic Inventory of the Class of 1959 are some of the many services provided in this area.

NEXT YEAR?

Next year and each year thereafter we will continue to have two major problems, i. e., personnel and money. Over 3,500 are enrolled this year in our three junior high schools. The senior high school will soon feel the impact of this "crest" now in Grades 8 and 9. The question is not "*Can* they be accommodated?" They are being housed now and can be housed in the future because approximately 1,000 of them will transfer or drop out. The question of importance is: "*How should* they be accommodated?" In a new building, the curriculum determines the physical plant. But with a plant in existence, its capabilities and its possible modifications do affect modifications of the curriculum. Therefore, when the Marshall report is submitted and evaluated, a master plan for the 1960's should be drawn with problems defined and priorities established.

ELEMENTARY EDUCATION

Miss Mary A. Keneally, Assistant Superintendent of Schools,
Department of Elementary Education

Even well-trained, experienced teachers need help now and again if they are to discharge their responsibilities effectively. Good in-service courses, Extension courses, and meetings with various textbook consultants who present the advances in subject matter and good teaching techniques, will help to keep our teaching personnel alert and flexible.

Following this trend of thought, it seemed feasible early in 1960 to offer teachers in the intermediate grades an opportunity to enroll in an In-Service French Course. This was conducted by members of the High School French Department for close to sixty members of our elementary teaching staff who are responsible for the teaching of French to pupils in Grades Four, Five and Six.

A completely revised Spelling textbook was adopted in the elementary grades this year, and it was deemed advisable to bring into our schools an informed consultant to demonstrate and discuss the modern methods to be used in teaching spelling. Miss Phyllis Carter of the Charles E. Merrill Publishing Company spent a day here on October 20, 1960 giving a demonstration lesson for all sixth grade teachers in the morning, and presenting a professional spelling talk to all elementary teachers at a general meeting in the afternoon.

Two State Extension Courses were organized in the Fall and more than fifty teachers from Greater New Bedford are currently enrolled in either the "Remedial Reading" Course or the Course entitled "Psychological Foundations in Education".

The World Book Company loaned the New Bedford Public Schools the services of an arithmetic consultant for a complete week in May to introduce the materials in our newly adopted arithmetic textbook. Teachers in each specific grade spent an entire session becoming acquainted with the contents of the book they were to use in September. Numerous teachers have expressed gratitude for the wealth of helpful suggestions that were offered at this Arithmetic Workshop.

Again in November, this same Arithmetic consultant returned to New Bedford and spent three days in our schools, meeting numerous teachers and offering advice and helpful suggestions on presentation of new material. Group meetings of the entire teaching staff were arranged after school hours so that everyone benefited by her presence.

March twenty-ninth was a red-letter day for a group of talented sixth grade students selected from all elementary schools to attend a day-long Art Class at the Elizabeth Carter Brooks School. This was an enrichment form of instruction provided by Mr. Paul P. Vancini, Art Director, and his corps of teachers.

During this same month, all fourth and fifth grade teachers attended demonstrations of two literature lessons presented by a representative from one of the publishing houses from which we purchase supplementary reading books. Literature serves children in so many subtle and clever ways that we are urging teachers to make more skillful use of it, as publishers continue to make available excellent story books filled with wonderful material. Such reading material provides additional information, broadens the child's concepts, and deepens appreciation of life around him.

The Enrichment Classes in our New Bedford Schools are now in their fourth year of existence. They are still, however, operating under the handicap of somewhat inconvenient and unsatisfactory housing, as they are located in three separate buildings, often at a considerable distance from a child's home.

Every community has an obligation to adjust education to the varying abilities and interests of children so that they will make the best use of their capabilities. By providing the bright children in New Bedford an opportunity to partake of such a program, we are offering the kind of education that a democracy considers important. Educators predict that a much stronger program for our gifted children will be in evidence everywhere during the next ten years.

Our enrichment program does not cut down on the teaching of essential subjects, for we sincerely believe that all children — bright, average or slow — need discipline in learning. Gifted children are capable of learning more rapidly than average youngsters and thus the selected pupils in our Enrichment Classes are provided with extra opportunities to investigate and undertake projects not normally included in an average classroom where more time is allocated to routine essentials.

Looking forward to September 1962, it is anticipated that three Enrichment Classes will be able to occupy classrooms in the newly contemplated elementary school which is to be erected on the Hathaway Playground site.

By continuing to house three enrichment classes at the Ashley School for children who live in the North end of the city, we would thus complete our Enrichment program for the New Bedford Public Schools. Each year these students would become the nucleus for the Junior High Special Progress Program.

The question of Homework in the elementary schools has arisen time and again, as a great many teachers and parents feel that it is most important to include an assignment of homework in the program for the intermediate grade students of the elementary schools.

Educators feel that it is advisable to train children in good work habits, to provide them with essential practice, and to initiate in them self-direction by requiring daily homework beginning early in the elementary school.

Such a homework program was presented to, and approved by the School Committee in November 1960 and will, therefore, become a part of the elementary school curriculum commencing in January 1961.

School children are now living in an era which demands that science and mathematics have a prominent place in the elementary school program. The National Defense Education Act of 1958 has been of tremendous assistance to the New Bedford Public Schools, for it has enabled us to supply our classrooms with valuable manipulative materials for the teaching of science and mathematics, which under ordinary circumstances would be very costly. Fourteen of our elementary schools have been equipped with portable science laboratories made in the Maintenance Department of our Public Schools. An In-Service course in elementary science experiments is tentatively planned for 1961 so that teachers lacking a strong science background will acquire useful knowledge that will make them more confident in the field of science.

Improvement in education requires constant changes in curriculum, and by the close of this year a much improved Social Studies Course is being placed in the hands of elementary teachers from kindergarten through the sixth grade. Adopted this year for use by fourth grade students was a new *History of New Bedford* by Reginald B. Hegarty. It will be placed in the classrooms in January 1961. Work is rapidly being completed on a strong new Course of Study in English and is to be distributed shortly to all elementary classrooms.

A continuous appraisal and evaluation of the type of education that New Bedford schools are offering our children must be made by your administrators if this education is to be of greatest service to our youth. We are sincerely endeavoring to provide for the children of New Bedford the most modern, useful and meaningful education possible. In the past few years new arithmetic, spelling and language books have been adopted for use in our elementary schools. Revised editions of our basic reading books have provided modern material that enhances the child's eagerness to learn.

We believe that we in New Bedford are doing an effective job of providing the kind of education that is important. However, there are always a number of areas in which we have problems.

Although the elementary school day was lengthened by fifteen minutes in 1959, it did not effect the actual teaching hours. Within the last three years, television classes in science and French have invaded the elementary schools. Today, much more emphasis must be placed on the study of arithmetic, as well as on science and foreign languages. Therefore, it is becoming increasingly difficult to apportion the time in our daily schedules so that subjects such as reading, literature, and social studies are not slighted. The task of accomplishing all work required in the Course of Study is fast becoming a burden for the elementary classroom teachers.

A possible answer to this critical situation is to lengthen the school day or the school year. According to a prediction made by Sam B. Lambert, Director of Research Division of the National Education Association, longer school days will be adopted by many school systems in the United States during the '60s. Another solution which would provide more time in the present daily schedule would be the elimination of the periods now allotted for art, physical education and music. Instruction in these specialized fields would be given only by supervisors working on a classroom schedule. These same supervisors would act as consultants whenever a teacher sought assistance in their particular field. There would be ample opportunities for the teacher to correlate these subjects with the major studies and thus no child would be seriously affected by their curtailment.

Progress, however, does not come without problems and, therefore, it becomes our immediate task to formulate an elementary school curriculum that will be attuned to the best interests and needs of the children living in this period of tremendous challenge in education.

During the entire year of 1960 I have become continually aware of the keen interest and loyal support that all members of the School Committee manifest in the welfare of the elementary schools, and I am sincerely grateful.

NEW BEDFORD HIGH SCHOOL

John F. Gracia, Principal

For the first time since 1955 the enrollment at New Bedford High School in September of 1960 dropped from the previous year high of 2330 to 2177 pupils. This lower enrollment had been anticipated because of the small ninth grade classes in the junior highs. However, the enrollment in September of 1961 will reach 2400, an all time high since the days just before World War II. The large seventh and eighth grade classes in the junior highs today indicate an enrollment of 2500 in a couple of years.

Our eight period day, now in its second year, has been successful in maintaining our normal routine of operations. It should be able to cope with an enrollment of 2500 pupils. A higher figure would mean a further search into doing things in a different manner. All this, of course, is based on the assumption that our curriculum of studies will remain static, and that the possibility of our becoming a comprehensive high school is dropped. That we are badly cramped there is no question. The important thing at the moment is that we can carry on until such time as the recommendations of Dr. John E. Marshall are known and, more important, are acted upon.

The physical condition of the school is rather good on the whole because of the fine maintenance work that has been accomplished in the past several years. A continuation of class room painting will eventually brighten some rooms that have not been touched in twenty-five years. The two biggest projects needing attention are our auditorium seats now 50 years old and all of our outside doors. Next September our auditorium will be used almost every period every day for recess and study hall periods. Our outside doors make the building anything but secure.

During the past several years the subject matter in our various courses have been studied and revised by committees in all of our departments. The revisions were completed in the spring and our duplicating department has turned out new courses of study in every field. There is no doubt that our department heads are quite determined to be alert about future revisions and to keep their fingers on the pulse of rapid changes in their various fields. At this writing several of our departments are contemplating a new revision of the recent revisions in several courses. It is my feeling that our department heads are doing a fine job in supervising their areas both in our school and at the junior high schools. Fewer assigned classes have made this possible, and the results can already be seen.

DEPARTMENT NOTES:

ENGLISH

The three major changes in the department this past year were the introduction of World Literature in the junior year in the college preparatory course, the new course Developmental Reading elective to all pupils in all courses, and new requirement that all students must successfully complete four years of English to receive a diploma.

The study of World Literature in the junior year in the college preparatory class is proving extremely satisfactory. Dr. Jeremy Brown of Boston University recently commented that the course is an excellent one. However, the paper backs do not seem to be standing up very well and their use may prove to be a false economy.

Developmental Reading is being given two periods a day. The purpose of the course is to help slow readers to improve, to help good readers to become better, and to improve comprehension for all. The Science Research Associates Reading Laboratory Kit, which is used as a basic text, allows a pupil to start at the level at which he is then reading and make individual progress at his own rate. Pupils do not compete with one another. The text provides an abundance of material on several grade levels, stressing the acquiring or developing of such skills as reading for the main idea, reading for details, reading for implied as well as for stated meaning, understanding the structure and meaning of words, and improving speed without sacrificing comprehension.

Speed in reading with good comprehension is further encouraged through the use of mechanical devices which eliminate needless eye regression and stimulate fresh perception. These mechanical devices and films to accompany them have been made available through the courtesy and cooperation of the Audio-Visual Department. There is no dearth of practice and study material in the new reading laboratory.

Most pupils who have been working in the laboratory daily are delighted at the progress they have made. In a relaxed yet purposeful atmosphere, where personal conference between pupil and teacher are encouraged, and where individual attention and instruction are offered, pupils are willing to recognize and discuss their specific weaknesses and equally willing to work for improvement.

Finally, the department is contemplating the recommendation that a teacher be given time to devote to the teaching of Oral English.

MATHEMATICS

The major changes in the department this year were the introductions of Practical Mathematics II in the business courses for those students who had had one year of algebra, and adding two extra periods for those pupils in the senior Pilot class.

Through the aid of the N. D. E. A. new equipment and new reference books have been obtained. The equipment can be used to make more meaningful abstract concepts of mathematics and also to explain practical applications of mathematics. The new reference books approximately ninety in number have been added to the school library.

Serious consideration is being given to converting Room 103 into a math laboratory to be used for the storage of all math equipment and as a workshop for students and teachers.

SOCIAL STUDIES

The various courses offered in the department now include material on Communism as contrasted with our American way of life. During the year the department sponsored assembly programs during American History month, and cooperated with two State Department of Education projects the Annual Student Exchange Program and the "Get Out the Vote" Campaign.

A new course "Problems of Democracy" will be offered in September 1961 as an elective to the junior and seniors in the college preparatory courses.

The department was especially pleased with the new rule that the successful completion of one year of American History is now required to receive a diploma.

SCIENCE

As in other departments the revised courses are now in effect. Acquisition of much valuable modern equipment for enrichment of science classes has been made possible by use of funds under provisions of Title III of the N. D. E. A. Members of the department are availing themselves of the opportunities offered by the National Science Foundation to be brought up-to-date on the latest developments in their respective fields. Four members have attended Summer Institutes, and two are now attending an In-Service Institute at Brown.

FOREIGN LANGUAGES

The N. D. E. A. has so emphasized the study of Foreign Languages that it has given a heavy boost to the teaching of these languages. In 1959-1960 we used an "interim lab" where we familiarized ourselves with some of the techniques. The installation of a new fifteen position, dual track listen — response — record lab is a noteworthy event. Room 223 is a most attractive, restful yet exhilarating room. The master console keeps the monitor in touch with all fifteen students working. Whether the student is working from a master tape or on an individual basis, the monitor can hear and make needed suggestions. The corrections are immediate since they are on tape. From the little experience we have had with the "lab" it is almost safe to predict that under competent supervision its possibilities are almost limitless. The "lab" is, of course, available to all the foreign languages in the school – French, Portuguese, German, Russian and Latin.

BUSINESS EDUCATION

The only major change in this department this year is the new requirement that all students must now take three years of typewriting. A new course called "Notehand," the new shorthand, is now under study. It would be offered as an elective to college preparatory students with the belief that it will enable students to record at a greater rate the essential points of a given lecture or class discussion.

PILOT CLASSES

We are now in the third year of our so-called "Pilot" classes. Their success is now an established fact, and the program should be enlarged in the next few years. As previously stated the pupils' permanent records indicate their membership in these enriched classes, and these should be of great value in their college transcripts of application.

EXTRA-CURRICULA ACTIVITIES

In this area progress is being made this year in three fields which have needed revitalizing for some time – student writing, debating, and dramatics.

1. *The Alpha* is in the stages of rebirth. This magazine, for many years a leader in its field, will make its first appearance in the early spring. A staff is in the making. This will be a proper outlet for student writing, a stimulus for creative work, and also training in journalism and magazine making.

2. *The Debating Club* is again coming to life. Its goals are to stimulate logical and constructive thinking, to develop poise

in speaking, to gain an understanding of types of public and group discussion. The club is hoping to enter forensic competitions in the area.

3. *The Dramatic Club* is expanding. In addition to its annual spring play, two one-act plays will be presented in our Assemblies. Club membership has increased. The club is proposing a Drama Festival for Bristol County, and letters have already been sent to various schools.

DRIVER TRAINING

We are now in our first year of the revised program in Driver Training. Under the old program two teachers were able to take care of about 120 pupils. Under the new program one teacher will be able to take care of more than 300 pupils. Instruction is now given three periods per week for one semester on an elective basis. The revised program takes care of the thirty clock hours instruction required by the State Department of the Registry of Motor Vehicles. Removed from the course is the six hour training required behind the wheel. This must now be taken outside of school at official Driver Training Schools.

On the completion of the course in school, each student receives a certificate showing he has satisfactorily completed the course, automatically making him eligible for further training behind the wheel at an official Driver Training School.

EVALUATION

As an accredited member of the New England Association of Colleges and Secondary Schools we must follow the standards and practices of the Association to maintain our standing. High school members of the association must be evaluated as to their curriculum by 1965. In the past several years the administration and many members of the faculty have studied the mechanics of evaluation by taking a course, attending conferences, and serving as members of visiting committees.

We are now well on our way in the self evaluation process. A steering committee was named in September to organize the entire self-evaluation. Two other committees were named as required by the program. The "B" Committee is studying "Pupil Population and School Community." The "C" Committee is studying "Educational Needs of Youth." These two committees form the basis for the evaluation of the school, and their reports are used as a point of reference in checking and rating all items of the Evaluation Criteria.

Our self-evaluation will be completed by the first of April. The rest of the semester will be used to review and to recheck the various reports and to make ready for the visiting committee. October 23, 24, and 25 are the dates during which the official evaluation will be made by the visiting committee.

The year has been an extremely busy one as have those in the recent past. Many changes in curriculum and operational practices have taken place. It has been our policy in making changes to hold on to what is good and to adopt changes only to do things better. However, without the understanding and cooperation of both the Superintendent and Assistant Superintendent of Schools little could have been accomplished. For this cooperation the administration at New Bedford High School is deeply appreciative.

CONCLUSION

Directors of special subject areas have submitted progress reports for the calendar year 1960. These reports are on file in the office of the Superintendent and are available for perusal.

To the members of the School Committee and to my coworkers I express sincere appreciation for the cooperation and courtesy extended to me during the past year.

Respectfully submitted,

RUTH B. McFADDEN,

Superintendent of Schools.

FOREIGN LANGUAGES IN OUR SCHOOLS

"Words are weapons in the cold war, and they may also be instruments for peace". The United States today bears new responsibilities in many quarters of the globe. If we, as a nation, are going to assume and maintain the leadership that is expected of us, we are going to need many, many words and those words must be in language other than our own.

Our Federal Government has taken full cognizance of our shortcomings and is doing all it can to encourage the study of foreign languages. The younger the student is the better he learns. In addition to learning a second language, he is accepting different cultures as well. For years and years European children learned two, three, or even four languages. This was important no doubt, because of his proximity to other countries. In our shrinking world distances, we find ourselves very near to all the world's peoples and we also must be able to communicate with them.

Communication can not be mastered by studying the written word alone. Our ears must be trained and our conversation must be understandable; therefore, new techniques must come into our schools.

The aural-oral method of presenting foreign languages is not a new fad. It is safe to claim that in New Bedford, where the language teachers are truly bi-lingual, there has always been an emphasis on the comprehension and speaking of the language. This great stress of the aural-oral approach shows that we need a greater number of students mastering a foreign language and we need greater speed in the mastery. This accounts for the great popularity of records, tapes, and all devices which will help students attain their goal as speedily as possible.

In the late twenties, in Coleman Report which became the Bible of the language teachers, the stress was placed on reading and writing. Just thirty years later, we have reversed our stand. It is now comprehension, speaking, reading, and writing. The College Board exams, which we might use as a thermometer of skills to be measured, in 1960 introduced listening comprehension tests in French, Spanish, and German as a part of the Achievement Test.

The University of Massachusetts has for the last two years given a listening test to entering students in an effort to place them in proper classes, as well as to measure proficiency. This is just a beginning. Already work is being done to devise tests where students will have an opportunity to record their responses.

What a boom and thrill to a language teacher to hear that the appointment of an Ambassador to France in 1961 was being questioned because of his lack of proficiency in French. All this proves that our young people should come up through the elementary schools learning a second language in a completely natural manner. In that way, they will have a chance to become really proficient in foreign idioms before they graduate from high school.

For many years teachers of Modern Foreign Languages in our Senior High School have felt that there was a great need for the introduction of language in the elementary grades. They felt that this should be a conversational course, and that it should be in a grade where boys and girls love to mimic and dramatize and will be without embarrassment while performing before their classmates.

In September 1959, the New Bedford Educational Television Program, sponsored by the Department of Audio-Visual Instruction, was beginning its second year. At that time, the Modern Language Project of the Massachusetts Council for Public Schools was prepared to present a program in Conversational French for inschool listening. After study and consideration the Superintendent met with principals and fourth grade teachers and explained a new fourth grade program. It was decided to start on a three year experimental basis, and, early in October, Parlons Francais was introduced in all fourth grades. Madame Slack, the T-V Teacher, presented two fifteen minute programs weekly and one half hour program for teachers each Monday after school. In checking the course at the end of the first year, teachers reported great interest and enjoyment on the part of the fourth graders. Madame Slack is a very fine teacher and her understanding of her students makes her part of every classroom. Songs taught on the French Program were repeated in the classroom and music supervisors, on their visits, incorporated television songs in their regular lessons.

Late in the Spring, realizing that fifth grade teachers were going to continue, a workshop (after school hours) was set up for them. This was sponsored by Mrs. DeMello, head of the French Department in the High School. Sixty fourth, fifth, and sixth grade teachers attended fifteen sessions taught by Mrs. Plaud, assisted by Mrs. Wynn, Miss Luiz, and Mr. Duhamel.

Thanks to this course and the excellent guides put out by the Project, the fifth graders started French in October 1960. As this is an experimental program, there has been no attempt to really evaluate it. However, we have reason to believe that our fifth graders are growing proficient in their second language. According to the plan of the Modern Language Project, the group producing this program, there will be no formal grammar, no written work or reading of the language until the beginning of the fourth year. With our 6th graders beginning the language in September 1961, we will reach that fourth year in September 1962, when the original French classes will be in the seventh grade.

The fourth and fifth grade teachers who are working on this program have done an outstanding job and the fact that the French Department of our Senior High School has shown intense interest in the program has been very helpful. Tape recordings of all the programs are available through the Audio-Visual Department, as are records for self testing.

While our elementary grades were experimenting with a new language thanks to the National Defense Education Act, the secondary teachers of Modern Foreign Languages were interested in a new technique on the secondary level.

THE LANGUAGE LABORATORY

When all the uproar about Language Laboratories started, our teachers became very interested. This was not a brand new idea. Colleges have had them a long time ago — but public high school??? The Director of Audio-Visual Instruction met with the Superintendent, the Assistant in charge of Secondary Schools, and the language teachers to find out:

1. If they were interested?
2. Were they willing to experiment?
3. Would they study the research and decide just what they want a language laboratory to do?

The answer to all these questions was "yes." A few weeks later, the University of Massachusetts saw a group of New Bedford teachers enroll in a Seminar on Language Laboratories.

In September 1959, the Maintenance Department working with plans made out by the Audio-Visual Department produced an "Interim" Lab. The high school teachers were happy with the ten positions, ten tape recorders, the ten head sets, jacks, aggregate boxes and two long tables divided into five positions apiece. That the wires were not long enough to reach the aggregate boxes; that the box had to be brought into the middle of the group; or by the time that ten positions were in operation there was a maze of wires and connections; that if you had forgotten to stand outside the connections in order to operate, you had to crawl under the table — these were very slight inconveniences and were overlooked. The teachers and students were working in a "lab". The students were listening, responding, recording their own voices, making their own tapes, trying out different kinds of drills, and they were all getting ready to say, "Yes, we want a professional Lab. We think it will be a great help to us." The pupils were most cooperative; they made suggestions, they tried out new ideas, they were attentive and helpful. So, in June 1960, the faculty said, "We are ready."

In September 1960, our Senior High School had a new language Laboratory. A beautifully painted room, with acoustical tile on ceiling and over blackboards, fifteen individual positions with dual track listen-respond-record-facilities, a master console with three decks and a monitoring panel for all fifteen positions included.

The first reaction was that the faculty would never be able to learn all the operations of the Lab; but, they had a very complete instructional session as always happens when a new Audio-Visual installation is put into our schools. They tried out different operations; they made mistakes; they forgot they had a microphone in hand and shouted so that the students were almost blasted out of the room; but by October 12, they were in "operation". They were ready for either one or fifteen students.

No student is ever alone in the Laboratory. The teacher at the console is listening, suggesting, correcting, and helping. Here are the advantages of a Lab from the student's point of view:

1. There are just the two of us — student and teacher.
2. We have freedom to speak up — no one hears his mistake except the friendly teacher — and the corrections are right on the tape.
3. We have constant participation — every bit of lesson is done actively by the student and he becomes his own critic.
4. The immediate results are tangible and the student sees his progress.

We also have other auditory and visual materials in the Laboratory — 16mm and 35mm projectors, screens, extra tape recorders and record players and light can be controlled for all of these techniques. There are tapes that accompany student textbooks, as well as listening tapes for comprehension purposes, and "home made" tapes on pattern drills. The potentialities of the "Lab" are almost limitless and must be explored carefully. Our Laboratory has not been used in lieu of recitation; rather, it might be called a Language Library where you devote unassigned and extra time in mastering a Foreign Language.

The pictures on the following pages denote the activities of our students in the foreign language area.

COOK SCHOOL

The television teacher visits us twice a week.

PARLONS FRANÇAIS

Our first French play, ... and it was a success!

"Les Cloches," we sing like French children sing.

We learned this French dance on our television class.

Il fait du ski. He is skiing.

Il neuge — it is snowing.

"Props" bring realism to a new language and culture.

Enrichment Class French project.

Elementary school teachers receive in-service training in conversational French.

The "interim" laboratory — we tried out the new technique.

Teacher education in language laboratory techniques.

French, German, and Russian students work for self-improvement in their new Language Laboratory.

·Teachers in College Extension course work in the Language Laboratory.

Famille Romana — Potestas vera Romae Antiquae.
The Roman Family — The real strength of Ancient Rome.

Oude fua Lisbra?
Where is Lisbon?

Aprendemos português para melhor compreensão do Brasi e de Portugal no mundo de hoje.

We learn Portuguese for a better understanding of Brazil and of Portugal in the world today.

The maintenance department constructs efficient science tables.

Tables completed and on their way to elementary schools.

Science tables -- welcome additions in modern classrooms.

Report of the School Committee

STATISTICS

POPULATION AND VALUATION

The population of the city (census of 1960)	100,258
Valuation of taxable property was	$150,958,250.00
Schoolhouses and lots	9,939,900.00
Other school property (furnishings, etc.)	1,165,357.22

APPROPRIATIONS

Rate of taxation (per $1,000.00)	$69.20
Amount for general school purposes not including new buildings	$4,520,172.03

SCHOOL CENSUS

Number of children between five and sixteen years of age, and illiterates (not having completed Grade 6) between sixteen and eighteen years of age, reported by the Attendance Department in accordance with the census taken October 1 ,1960.

Between 5 and 7 years	3,502
Between 7 and 16 years	15,263
Between 16 and 21 years	224

SCHOOL ORGANIZATION, SEPT. 1, 1960

ANNUAL REPORT

of the

COMMISSIONER

of

PUBLIC WORKS

of the

CITY OF NEW BEDFORD, MASS.

to the

CITY COUNCIL

1960

BRADBURY-WARING, INC.
New Bedford, Mass.
1960

COMMISSIONER'S REPORT

March 7, 1961

Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen:

In compliance with Chapter 3, Section 58 of the City Code, I herewith submit the annual report of the Department of Public Works for the year ending December 31, 1960.

Appropriations and expenditures are shown in the various tables, together with a chart indicating the comparative Highway expenditures for the period from 1921 through 1960.

The operation of the department was confined mainly to general maintenance in the various divisions: Highways, Forestry, Engineering and Sewage Disposal. Individual comment on the activities of each division appears unnecessary due to the fact that all pertinent information is contained in each divisional table.

EQUIPMENT: No money was allocated for new equipment in either 1959 or 1960. Seven of our dump trucks have been in operation for over thirteen (13) years. These trucks are used daily. They have a high operating cost and are apt to break down when called upon to perform heavy work. This is especially noticeable during hurricanes and snow storms. I strongly recommend immediate replacement of these seven (7) trucks and a yearly program of equipment replacement for all units in use over five (5) years.

CHAPTER 90: Under the Chapter 90 program, Church Street from Nash Road to Phillips Road was widened and rebuilt, and a new bridge was built over the Acushnet River at Tarkiln Hill Road. The Town of Acushnet participated in the bridge cost.

The regular operations of the department were halted by the hurricane of September 12, 1960. The Forestry personnel, augmented by employees from the Highway Division plus hired equipment were utilized to clear the streets and walks of fallen trees and debris. Some permanent repairs have been made to streets and sidewalks. The remainder of the work will be completed in 1961.

SNOW REMOVAL: On December 20, 1960 the Traffic Commission passed an order prohibiting parking on the west and south side of most city streets during the hours of 12 midnight and 6 A.M. from December 1 through March 31. This order will greatly facilitate our snow plowing operations.

Each succeeding year, it becomes more difficult to hire snow plowing equipment. It appears that the City will of necessity have to purchase additional plows in order to properly perform the work.

I wish to express my appreciation for the cooperation that I have received from His Honor, Mayor Francis J. Lawler, members of the City Council, the various department heads, and my own capable assistants in carrying on the work of the department.

Respectfully submitted,

JAMES McQUADE
Acting Commissioner

ENGINEERING DIVISION — 1960

AIRPORT COMMISSION — Plans were drawn and surveys made in connection with avigation easements, land taking, and various other projects.

ASSESSORS — 1876 Real Estate transfers were recorded and indexed, 160 Probates checked and recorded and 240 plot changes were made. New streets were added to the plots and twelve new plats were drawn.

BOARD OF APPEALS — Thirty-four surveys and plans were drawn and records kept.

BUILDING DEPARTMENT — Lines and grades were given for 228 new buildings. The buildings were numbered and records kept.

CHAPTER 90 — The Engineering Division cooperated with State and District Engineers before and during the construction of Church St. and for proposed projects on Shawmut Ave. and Braley Rd.

CITY SOLICITOR — Plans, Descriptions and Blueprints.

CURBING — Lines and grades were given for setting 2,704.8 lineal feet of curbing. Inspection and measurement was made of the same.

HARBOR DEVELOPMENT COMMISSION — Plans were drawn and surveys made for the development of the new industrial area along the waterfront. Also Piers 3-4, Homers Wharf, and the Fairhaven Bridge northerly.

HOUSE DRAINS — One hundred thirty-five (3,375 feet) new house drains and twenty-four relays were laid connecting house sewer and surface pipes with the main sewer. Locations of these drains were measured, records were made of the same and drawn on drain plots.

INDUSTRIAL PARK — The Engineering Division worked in close cooperation with private engineering companies in the development of the Park.

PLANNING BOARD — (Zoning) Eighteen plans for zoning changes were made and lists of abutters made and reported.

PARKING METERS — Five surveys and plans were drawn for new meters and removal of meters. Surveys were made for No Parking signs and laying out stalls for No Parking areas. Surveys and plans were made for 5 contemplated Parking lots.

PARK BOARD — Plans and surveys were made for new park areas, playing fields and beaches.

SEWERS — Surveys, plans, lists of abutters, assessments, contract plans, and specifications were made for seventeen new sewers and eight new surface drains. Construction costs, inspection, lines and grades were given for 6,694 feet of sewers and 3,060 feet of surface drains. Records of construction, final plans, and final assessments were made and reported.

SIDEWALKS — Surveys, plans and estimates were made for eight projects under the Betterment Act. Measurements, records, final plans, and assessments were made and reported. Plans and estimates were made for 277 projects laid by bonded private contractors for property owners.

STREETS — Surveys were made and plans drawn for the acceptance of seven new streets, three street line alterations, and two discontinuances. Lines and grades were given for all street construction and public utilities construction. Surveys were made and points set for the installation of new street bounds.

TRAFFIC COMMISSION – Surveys were made and plans drawn. Traffic counts were made at twenty-four intersections.

ROUTE 95E – 140 – The Engineering Division cooperated with State and Federal District Engineers on the proposed projects.

WATER BOARD – Lines, grades, Engineering and Survey information as required were given for all water main extensions.

MISCELLANEOUS – Lines and grades were given for fences, street lines, and sidewalks. Sixty-six accident or damage sites were surveyed and photographed. Plans were drawn to prepare for possible court action. Numerous plans were drawn and descriptions prepared for study by the City Council, Council Committees, and the City Solicitor.

Weather records were kept daily on rainfall, snowfall, wind velocity, temperature, and tides. This weather information was reported to State and Federal agencies and was made available to the public. Records were kept of street sweeping and ash collections. The area of cuts in pavements and walks were measured and recorded. City maps and plans were kept up to date, blueprinted, and indexed.

GENERAL STATISTICS

January 1, 1961

Set off from Dartmouth	1787
Incorporated as a City	1847
Length of City	10.78 miles
Breadth of City (Maximum)	3.10 miles
Highest point	1250 feet north of Rockdale Ave. and Hathaway Road. Elevation 181.50 feet
City Datum	Based on 0.85 ft. above mean high water
State Datum	Based on mean sea level 2.55 feet below City Datum
Geometrical center of City	Nash Road and Mt. Pleasant St.
Area – Land	12,241 acres
Ponds	193 acres
Land – Ponds	12,434 acres – 19.42 sq. miles
Tidal Water	8,451 acres – 13.21 sq. miles
	20,855 acres – 32.63 sq. miles
Length of frontage on tidal waters	10.13 miles
Depth of main channel	30 ft. at low water
Average rise and fall of tide	3.58 ft.
Population – Registrar of Voters estimate	100,258
Assessed valuation	$150,958,250
Assessed valuation per capita	$1,505.82
Accepted streets – Area 1,415.588 Acres	240.161 miles
Bridges (3)	0.796 miles in New Bedford
Sewers	255.04 miles
Length of Intercepting Sewer:	
Outfall	0.626 miles
Intercepting	9.188 miles
15 Public Parks	260.10 acres
14 Public Playgrounds	31.72 acres
1 Rifle Range	230.35 acres
7 Parking Lots	4.73 acres
32 School Buildings – Area of Grounds	116.60 acres
1 Airport – Area of Ground	797.15 acres
Area of Easement	117.28 acres
5 Wharves – and other waterfront land (Harbor Development Comm.)	70.074 acres

STREET INVENTORY

January 1, 1961

BRIDGES:

Coggeshall St. — ¾ Maintained by New Bedford
Slocum St. — ½ Maintained by New Bedford

PAVEMENTS:

(Note:—In the following list the area is the total of that kind of pavement on all streets, but the length is the length of street where that material is the principal pavement.)

	Length miles	Area Square Yards
Bituminous Concrete (stone block or crushed stone base)	148.28	2,392,739
Bituminous Macadam	52.90	853,453
Water Bound Macadam	5.30	85,507
Bituminous Concrete (Oil Gravel Base)	23.41	377,776
Granite Block	.13	15,964
Concrete	.11	1,697
Oiled Gravel	8.62	181,521
Unimproved streets (some have been graded)	1.00	
New Streets (Accepted 1960)	.41	
	240.16	

SIDEWALKS:

Cement Concrete	160.687	661,896
Bituminous Concrete	80.646	360,949
Flagstone	5.25	12,320

CURB:

		Lineal feet
Granite Curbing	277.237	1,199,811

	Length miles	Lineal feet
Concrete Curbing	29.062	153,448
Concrete Curb & Gutter	1.05	5,444
Bituminous Concrete Curb	10.078	53,212

SEWERS:

Combined	127.553	
Sanitary	55.691	
Storm	61.984	
Interceptor & Outfall	9.814	
Miles of Sewers (Including Interceptor)	255.04	
Cost		$7,999,121.98

2622 Catch Basins

1071 Inlets

135 New House Drains 3,375 feet

Total of House Drains 17,765

WATER BOARD REPORT

February 15, 1961

To the Mayor and City Council
of the City of New Bedford

Gentlemen:

In accordance with the provisions of Chapter 25, Section 12 of the City Code of New Bedford, the Water Board herewith respectfully presents this, its ninety-first annual report, covering its operations for the calendar year 1960, and including the reports of the assistant superintendent and water registrar.

Mayor Francis J. Lawler nominated Mr. William P. McIntosh as a member of the Board and the City Council confirmed his appointment for a term to expire June 1, 1964.

Mr. Howard C. Mandell, who had been superintendent of the department and clerk of the Board for nineteen years, retired on August 20, 1960. He had been an employee of the department since 1927. The Water Board takes this opportunity to express its appreciation for his long and efficient service in the department.

Upon Mr. Mandell's retirement, Mr. Frederick W. Anthony, assistant superintendent, was named by Mayor Lawler to have charge of the department, pending appointment of a superintendent. Mr. Nathan S. Ellis, III, was appointed as superintendent, the appointment to become effective in January, 1961.

The Water Board elected Mrs. Helen M. Taylor as Clerk of the Board.

The average daily consumption for the year was 20,055,172 gallons, slightly lower than that for 1959.

The ordinary receipts amounted to $745,830.08. After all expenditures, including bond payments and interest on bonds, $56,036.52 was returned to General City Funds.

$200,000, proceeds of Water Loan No. 1 of 1959, was made available for the purchase of materials for mains and services and for equipment for the department. Part of the proceeds from this loan will be used to defray the cost of installation of a second feeder line, 16 inches in diameter, for the Industrial Park.

$60,000 from the sale of bonds from authorization of Water Loan No. 1 of 1958, was received for the purchase of new meters. There still remains a balance of $60,000 in this authorization.

Our water debt as of December 31, 1960 amounts to $2,381,000.00.

Sullivan-Foster, Inc., completed the work of installing butterfly valves and travelling screens at High Hill Reservoir. Included in the contract was an extra work order for winterizing the west gate house at the reservoir. The total amount of the contract was $89,240.90.

Rules and regulations governing and restricting the use and supply of water for air-conditioning and for refrigeration were accepted during the year and made effective as of July 26, 1960.

Approximately 50 acres of land between Marion Road and the easterly shore of Pocksha Pond in Middleboro, were purchased from Henry and Grace Hartley for $3,400.

It was recommended that the services of qualified water supply engineers be engaged to study any and all possible sources of additional water supply for the City of New Bedford.

The following abstract from the water registrar's report shows in condensed form the financial operations of this department during the year. Full details will be found in his report, which accompanies this.

FIRST, BASED ON THE BUDGET SYSTEM IN ACCORDANCE WITH CITY AUDITOR'S ACCOUNT

	Salaries & Wages	Labor	Gen. Expense	Out of State Travel	Pensions	Total
1960 Budget	$136,500.00	$130,000.00	$125,241.94	$9.00	$24,556.22	$416,307.16
1959 Encumbrance			6,051.67			
Refunds			273.40			
Transfers	5,650.62	7,679.69				
Transfer from Loan #1 of 1959			1,132.69			
Total	142,150.62	137,679.69	132,699.70	9.00	24,556.22	437,095.23
1960 Expenditures	141,716.05	137,164.11	132,318.37	9.00	24,556.22	435,763.75
Balances	434.57	515.58	381.33			1,331.48
Less: unexpended balance carried to 1961			381.33			381.33
Balances reverting to General City Funds as of December 31, 1960	434.57	515.58				950.15

SECOND, BASED ON RECEIPTS AND EXPENDITURES

RECEIPTS

For water, meter rentals, demands and charges		$707,050.10
Miscellaneous receipts		38,779.98
Receipts from 1955 Bond Issue		35,467.22
Receipts from 1956 Bond Issue #1		49,058.64
Receipts from 1958 Water Loan #1		13,370.20
Receipts from Additional Supply, Chap. 400 — 1924		3,400.00
Receipts from 1959 Water Loan #1		65,791.87
Total receipts		$912,918.01

EXPENDITURES

Management and repairs from appropriation	$131,194.68	
Management and repairs from Bond Issue	167,087.93	
Payrolls from appropriation	303,436.38	
Interest	82,162.50	
Bonds	173,000.00	
Total expenditures		$856,881.49
Balance reverting to General City Funds, Dec. 31, 1960		$ 56,036.52
The total outlay for the construction of these works exclusive of debt, interest, management and repairs through 1959 was		$10,426,158.24

INCREASE

Payments	Credit	Net	
179,263.57	27,653.11	151,610.46	151,610.46

The following is a statement of Receipts and Expenditures for the past ten years.

RECEIPTS AND EXPENDITURES SINCE 1950

REPORT OF THE ASSISTANT SUPERINTENDENT

March 3, 1961

To the New Bedford Water Board.

Gentlemen:

The annual report of the assistant superintendent on operations of the department for the year 1960 and on the general condition of the works is respectfully submitted.

The financial report of the water registrar, rainfall records, and the usual tables showing in detail the work of the department, are incorporated as part of this report.

RAINFALL

Total rainfall for the calendar year 1960 was measured at Quittacas Pumping Station as 51.79 inches, 12.6% higher than the average for the past sixty-six years.

POND ELEVATIONS

The water level of Great Quittacas Pond reached its highest elevation at 51.91 on April 13, 1960. Its lowest level was 49.26 on September 14, 1960, and the average for the year was 50.70.

The water level in Little Quittacas, which is controlled by means of a sluice gate at the narrows between Great and Little Quittacas Ponds, varied between elevation 48.41 on December 29, 1960 and 47.15 on September 7, 1960, with an average for the year of 47.73.

BUILDINGS AT WATER WORKS YARD

As before mentioned in previous reports, the buildings at the Water Works yard are in very poor condition, and the yard, due to its location is subject to hurricane tidal action. This entire facility should be moved to a higher and more central location whether or not the downtown spur road from the proposed 195 interstate highway requires part or all of the present Water Works site. The exact location of this spur road is still unknown at this time.

The heating system in the Repair Shop is in very bad condition and will have to be repaired or replaced very soon if the building is to continue to be used as an effective water department facility.

Temporary repairs must also be made to the North Garage roof if this building is to be used much longer, as presently the roof leaks very badly and water runs into the electric fixtures within the building.

The repairs before mentioned are urgent now.

It will be absolutely necessary to make these repairs in 1961 to avoid a dangerous situation unless a new facility is constructed very soon.

ELEVATED STORAGE TANK

As reported last year, this tank is in urgent need of thorough cleaning by sand blasting and brushing down to the metal, and at least a two-coat paint job on the inside and outside. Bare metal is exposed in many places and leaks may develop at any time if this matter is not attended to at an early date.

HIGH HILL RESERVOIR

Recommendation that a new chain link fence be erected around the facilities at High Hill Reservoir is again made. The old fence is falling down and is beyond repair.

Installation of two travelling screens and seven butterfly valves was made by Sullivan-Foster, Inc. during the year.

DISTRIBUTION SYSTEM

Hayden, Harding & Buchanan, Inc., were engaged to make plans and specifications for award of contract for installation of a second feeder line, 16 inches in diameter, to supply the Industrial Park.

Forty hydrants have been damaged as a result of traffic accidents. The total cost of repairs was $3,918.78 and $2,474.09 has been collected.

LEAKS

There have been twenty leaks on main pipe during the year, as herewith shown.

Date	Size	Location	Cause	Cost
Jan. 15	8″	Shaw St., 69.6′ E. x 1st Hydrant E. x Church St.	Cracked main	$118.12*

*No actual payment made for cost of street repairs.

11,464 feet of distribution main, in sizes from 4 inch to 12 inch, were added to the system during the year and none was removed.

No distribution pipe less than 4 inches has been laid and none removed. The total length now in use is 11,198 feet.

Twenty-nine stop gates have been set and one of those previously set has been removed. The total number now in use is 3,475.

The total number of small size gates now in use is 92.

The total number of waste gates now in use is 210.

The total number of air taps now in use is 216.

Twenty-seven private gates have been set and two of those previously set have been removed. The total number now in use is 1,063.

Thirteen new hydrants have been set and four of those previously set have been removed. The total number now in use is 2,094.

The total number of water cart hydrants now in use is 21.

The total number of sprinkler cart hydrants now in use is 8.

One hundred eighty-three service pipes have been laid and fifteen of those previously laid have been removed. The total number now in place is 23,023. Of this number, three hundred forty-five are unmetered fire services, nineteen thousand nine hundred sixty are metered, and the balance, two thousand seven hundred eighteen are not in use.

Two hundred seventy-three service leaks have been repaired.

Three hundred fourteen taps have been cleaned as follows:

Rust 280: trouble inside 34

One thousand five hundred sixty-five meters have been removed for repairs, and one thousand five hundred fifty-three have been reset. Also two hundred seven new meters have been set for the year, making the total number now in use 19,960.

CONSUMPTION OF WATER

The consumption of water for the year has been as follows:

Month 1960	Monthly Consumption				Daily Average Consumption
	New Bedford	Dartmouth	Acushnet	Total	
	Gallons	Gallons	Gallons	Gallons	Gallons
January	559985600	23796050	4988250	588769900	18992577

December	512033400	24777200	4158000	540968600	17450600
Totals	6,977,773,500	300,643,400	61,776,000	7,340,192,900	20,055,172
Averages	19,064,955	821,430	168,787	20,055,172	

Maximum daily consumption — (24 hrs.) July 26	28,246,900
Minimum daily consumption — (24 hrs.) Dec. 25	11,179,400
Average daily consumption — 6 a.m. to 6 p.m.	11,266,293
Average night consumption — 6 p.m. to 6 a.m.	8,788,879

Amount of water consumed shown on above table includes the supplying of about 116.4 miles of distribution pipes located in the adjoining towns of Dartmouth and Acushnet. Dartmouth supplies 14,800 consumers, of which 723 are summer residents, through 4,116 taps. Acushnet supplies 4,750 consumers through 1,227 taps.

COMPARISON OF THE CONSUMPTION OF THE YEAR 1960 WITH THE RECORD OF THE 79 PREVIOUS YEARS

Year	Estimated Population	Estimated number of consumers	Number of taps	Total number of Gallons consumed	Average daily consumption	Gallons per day to each inhabitant	Gallons per day to each consumer	Gallons per day to each tap	No. of meters

*Includes population supplied in towns of Dartmouth and Acushnet 5343 taps, 19550 consumers

‡This consumption is for eleven months.

†This consumption is for thirteen months.

CONSUMPTION

The average daily consumption, 20,055,172 gallons, shows a slight decrease under 1959.

The excellent quality of our water for chemical processes and the extremely low average rate for takers using in excess of five million gallons per month have been important factors in the decision of several large industries to develop plants in our city.

The following table shows the number of accounts, registration, and income in the several steps of the sliding scale of rates.

DATA ON METERED CONSUMPTION AND REVENUE

July 1, 1959 through June 30, 1960

	No. of Accounts	Number of gallons			Receipts for metered water		
		Total Gallons	Per Account	Per day per Acct.	Total Receipts	Per Account	Per M Gallons
*Using less than minimum rate viz: 30,000 gallons per year	3,869	72,288,000	18,684	51	$ 29,554.89	7.64	.409
Using over minimum rate but less than 75,000 gallons per quarter	15,488	1,253,126,250	80,909	222	251,416.47	16.23	.201
Using between 75,000 and 750,000 gallons per quarter	432	329,968,500	763,816	2,093	58,409.40	135.21	.177
Using between 750,000 and 7,500,000 gallons per quarter	110	621,336,750	5,648,516	15,475	91,124.72	828.41	.147
Using between 7,500,000 and 15,000,000 gallons per quarter	7	231,390,750	33,055,820	90,564	27,212.86	3,887.55	.118
Using over 15,000,000 gallons per quarter	14	3,702,373,500	264,455,250	724,535	132,607.54	9,471.97	.035
Totals and averages	19,920	6,210,483,750	311,771	854	590,325.88	29.63	.095
Town of Dartmouth Venturi Meter	1	283,352,600		776,308	29,445.26		.103
Town of Acushnet — special rate	1	44,775,800		122,673	5,587.58		.125
**City of New Bedford Departments		61,626,000					
Metered Water Department Use		25,599,000					
Grand Totals	19,922	6,625,837,150			$625,358.72		

*Includes special assessment accounts

**Not charged to City of N. B. Depts.

The assistant superintendent wishes to express to the Mayor, the Water Board, and the members of the City Government, appreciation of their assistance during the year; and to express his gratitude to the employees of the water department for their co-operation in serving the public.

Respectfully submitted,

FREDERICK W. ANTHONY

Assistant Superintendent

September	5	50—45	2230	43070000	19314
October	4	32—	1600	32900000	20563
November	4	25—	1250	23690000	18952
December	4	32—	1330	32980000	24797
Tots. & Avgs.	55	478—45	23,820	471,460,000	19,793

Number of gallons No. 2 Diesel fuel required to raise one million gallons 100 ft. = 26.18 gallons.

Useful work per gallon of No. 2 fuel oil = 30,559,000 ft.-lbs.
Average Pumping Rate = 16,413 gallons per minute.

Average Horse Power of Useful Work = 800 H.P.

Cost of fuel oil to pump one million gallons = $6.31.

Cost of fuel oil to raise one million gallons 100 ft. = $3.27.

STATEMENT OF WORK DONE BY THE SERVICE DEPARTMENT FOR THE YEAR ENDING DECEMBER 31, 1960

Kind and Size	Services	Length on City & Taker
Copper tubing, 3 inch	3	84½
Copper tubing, 2 inch	16	582½
Copper tubing, 1½ inch	5	169½
Copper tubing, 1¼ inch	2	74.5
Copper tubing, 1 inch	58	2749
Copper tubing, ¾ inch	93	4511
Cast Iron, 8 inch	1	16
Cast Iron, 6 inch	5	142
Totals	183	8329

One 2 inch cast iron service has been removed and replaced with ¾ inch copper service.

Two 1 inch heavy lead services have been removed and replaced with 1 inch copper services.

Two 1 inch light lead services have been removed and replaced with 1 inch copper services.

Twelve ½ inch heavy lead services have been removed and replaced with ¾ inch copper services.

Twenty-three ⅝ inch heavy lead services have been removed and replaced with ¾ inch copper services.

Two ⅝ inch light lead services have been removed and replaced with 1¼ inch copper services.

Eighteen ⅝ inch light lead services have been removed and replaced with ¾ inch copper services.

One ¾ inch heavy lead service has been removed and replaced with ¾ inch copper service.

Six ¾ inch light lead services have been removed and replaced with ¾ inch copper services.

Two 2 inch cast iron services, one 1 inch copper service, one 1 inch light lead service, one ½ inch heavy lead service, one ⅝ inch heavy lead service, seven ⅝ inch light lead services, two ¾ inch light lead services have been removed.

Three 2 inch connections have been made to services.

The following extensions were made to services by takers:

140 ft. 3 inch copper tubing, 40 ft. 2 inch copper tubing, 4 ft. 1¼ inch copper tubing, 367 ft. of 1 inch copper tubing, 381½ ft. ¾ inch copper tubing.

Length of service pipe laid during the year	8710 ft.
Number of services laid in 1960	183
Number of services removed	15
Number to be added	168
Number in use December 31, 1959	22855
Number in use December 31, 1960	23023

SUMMARY OF STATISTICS

FOR THE YEAR ENDING DECEMBER 31, 1960

IN FORM RECOMMENDED BY THE NEW ENGLAND WATER WORKS ASSOCIATION

NEW BEDFORD WATER WORKS

NEW BEDFORD
BRISTOL COUNTY, MASS.

GENERAL STATISTICS

Population by census of 1960 — 102,447.

Date of construction, 1866 to 1869, inclusive. Further supply, 1895 to 1899, inclusive.

By whom owned, City of New Bedford.

Source of supply.—Water was first introduced on Nov. 26, 1869. From that date until July 10, 1899, the supply was taken from a storing reservoir artificially formed by constructing a dam across the valley of the Acushnet River, seven miles north of the centre of the City. This supply was augmented by a connection made in 1886 with Little Quittacas Pond.

Since July 10, 1899, the whole supply has been taken from Great and Little Quittacas Ponds, eleven miles north of the centre of the city.

In 1926, under Legislative Authority to take 11½ million gallons of water per day from Long, Assawompsett and Pocksha Ponds, a connection was made to bring water from Pocksha into Great Quittacas Pond, when needed.

Mode of supply.—Previous to July 10, 1899, the water flowed by gravity from the Acushnet Storing Reservoir (grade 40' + high water New Bedford Harbor) through a brick conduit 3 feet wide, 4 feet high, 5 6/10 miles long to a receiving reservoir (capacity 3 million gallons; grade 30') located opposite the Purchase Street Pumping Station. Thence it was pumped into the Mt. Pleasant Distributing Reservoir (capacity 15 million gallons; grade 154') located 1,879 feet distance, from whence it flowed by gravity into the city's distributing system.

Since July 10, 1899, the entire supply has been pumped from Little Quittacas Pond (grade 52'). It is pumped through two 48 inch force mains 8¼ miles long to a distributing reservoir (capacity 67 million gallons; grade 216') located upon High Hill, in the town of Dartmouth. From this reservoir, it flows into the city's distribution system by gravitation through two 36 inch cast iron pipes averaging 4 1/17 miles in length and one 42 inch pre-cast concrete pipe following a different course and approximately the same length. The concrete transmission line was put into operation in 1958.

It is also possible to pump directly to the city through a 48" and 36" main using the reservoir as a balance. This latter connection was completed in 1922.

The first named system is not now in use.

PUMPING STATISTICS

LITTLE QUITTACAS STATION

1. Builders of Pumping Machinery.

Electric Units

No. 1 10 million gallons per day certrifugal pump manufactured by DeLaval Steam Turbine Company, driven electrically by 400 H. P., 3 phase, 4160 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.

No. 2 Duplicate of No. 1.

No. 3 15 million gallons per day centrifugal pump manufactured by DeLaval Steam Turbine Company, electrically driven by 600 H. P., 3 phase, 4160 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.

The three foregoing pumps are controlled by switches and automatic starting equipment in a switchboard manufactured by the Electric Machinery Company.

No. 4 30 million gallons per day centrifugal pump manufactured by DeLaval Steam Turbine Company, directly driven by 950 H.P. Baldwin locomotive type 6 cylinder supercharged Diesel engine, 600 R.P.M., manufactured by the Baldwin Locomotive Company.

Electric current purchased of New Bedford Gas and Edison Light Company.

Total installed capacity, 65 million gallons per day.

LITTLE QUITTACAS STATION — Pump 4 "Diesel"

2. Description of fuel used.
   a. No. 2 Diesel oil.
   b. Brand of oil — various.
   c. Price of oil per gallon — delivered to Little Quittacas Station 10.11 cents.
3. Oil consumed for the year — 23,820 gals.
4. Total pumpage for the year — 471,460,000 gallons by Venturi meter.
5. Average static head against which pumps work — 168.5.
6. Average dynamic head against which pumps work — 193.0.
7. Number of gallons pumped per gallon of fuel oil — 19,793 gals.

8 Number of gallons raised 100 feet per gallon of fuel oil — 38,200 gals.

9a. Cost per million gallons raised into High Hill Reservoir — $11.42.

9b. Cost per million gallons raised into High Hill Reservoir — diesel fuel only — $4.82.

LITTLE QUITTACAS STATION — Pumps 1, 2, 3

10. Total pumping time for the year 13,760 hrs.

11. Total current used for the year 4,949,728 K.W.H.

12. Total pumpage for the year 6,866,891,012 gallons.

13. Number of gallons pumped per K.W.H. 1,387.

14. Number of K.W.H. required to raise one million gallons into High Hill Reservoir 721.

Cost per K.W.H. varies in accordance with amount consumed.

15. Average cost per K.W.H. $.01146.

16a. Cost per million gallons raised into High Hill Reservoir, (Pumps 1, 2, 3) $17.51.

b. Per power only $8.26.

Total cost of pumping, figured on pumping station expenses, viz: $125,607.22.

17. Per million gallons pumped $17.12.

18. Per million gallons raised one foot (dynamic) — 9 cents.

Cost of pumping figured on total maintenance and interest on bonds (see financial CC + DD) less credits, viz: $493,491.05.

19. Per million gallons pumped $67.25.

20. Per million gallons raised one foot (dynamic) — 36 cents.

Cost of pumping figured on total maintenance, interest on bonds and bond payments (see financial CC + DD + EE) less credits, viz: $666,491.05.

21. Per million gallons pumped $90.82.

22. Per million gallons raised one foot (dynamic) — 48 cents.

STATISTICS OF CONSUMPTION OF WATER

1. Estimated total population at date (New Bedford) 102,447
Acushnet 5,756; Dartmouth 14,800 ....*123,003
2. Estimated population on lines of pipe *121,000
3. Estimated population supplied *121,000

Year July 1, 1959 through June 30, 1960

4. Total consumption for the year 7,454,718,800
5. Passed through meters 6,625,837,150
6. Percentage of consumption metered 88.9%
7. Average daily consumption 20,368,084
8. Gallons per day to each inhabitant *166
9. Gallons per day to each consumer *168
10. Gallons per day to each tap (active) *796
11. Average rate received per million gallons metered $94.38
12. Average rate received per million gallons pumped $83.89

Year January 1, 1960 through December 31, 1960

13. Cost of supplying water, per million gallons consumed figured on total maintenance (item CC) less credits $56.04
14. Cost of supplying water per million gallons consumed figured on total maintenance plus interest on bonds (CC + DD) less credits $67.23
15. Total cost of supplying water per million gallons consumed figured on total maintenance, plus interest on bonds and bond payments (CC + DD + EE) less credits $90.80

---

*Includes population supplied in the towns of Dartmouth and Acushnet.

STATISTICS RELATING TO DISTRIBUTING SYSTEM

MAINS

1. Kind of pipe cast iron and steel.
2. Sizes, from 4 inch to 48 inch.
3. Extended 34,204 feet during the year.
4. Discontinued 0 feet during year.
5. Total now in use 251.655 miles.
6. Cost of ordinary maintenance per mile including flushing and inspecting gates and hydrants — $35.35.
7. Number of leaks per mile .079.
8. Length of pipes less than 4 inches diam. 2.12 miles
9. Number of hydrants added during the year 9.
10. Number of hydrants public 2094.
11. Number of stop gates added during year 28.
12. Number of stop gates now in use, 3475.
13. Number of stop gates smaller than 4 inch, 92.
14. Number of blow offs, 210.
15. Range of pressure on mains, 16 lbs. to 91 lbs.

SERVICES

16. Kind of pipe; lead, cast iron and copper tubing.
17. Sizes, ½ inch to 12 inch.
18. Extended 9261½ feet.
19. Discontinued 551½ feet.
20. Total now in use 176.4615 miles.
21. Number of service taps added during year:

New Bedford	168
Dartmouth	115
Acushnet	64
Total added	347

22. Number now laid:

New Bedford	23,023
Dartmouth	4,116
Acushnet	1,227
Total now laid	28,366
Total now in use in N.B.	20,305

23. Average length of service 40.4 ft.
24. Average cost of service for the year.

(a) Gross	$87.73

CITY ORDINANCE

Inspector of Gas Piping, Etc.

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-One

AN ORDINANCE

Providing for the appointment of an Inspector of Gas Piping and Gas Appliances in Buildings by the Superintendent of Buildings.

WHEREAS, the deferred operation of this ordinance would tend in part to defeat its purpose, therefore it is hereby declared to be an emergency ordinance which is necessary to insure the orderly conduct of municipal business and to enhance the public convenience.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Chapter 7 Section 157 of the Code of the City of New Bedford is hereby amended by adding to the end of said Section 157 an additional paragraph which shall read as follows:

The Superintendent of Buildings shall appoint an Inspector of Gas Piping and Gas Appliances in buildings, whose duty shall be the enforcement of the rules and regulations adopted by the Board established under section twelve H of Chapter twenty-five of the General Laws. (Ter. Ed.).

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

IN CITY COUNCIL, March 9, 1961

Emergency preamble adopted — Yeas 9, Nays 0.

Ordinance passed to be ordained. CHARLES W. DEASY, City Clerk

Rule 40 waived by vote of the City Council — Yeas 9, Nays 0.

Presented to the Mayor for approval March 10, 1961.

CITY ORDINANCE

Limiting Number of Class A Licenses

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-One

AN ORDINANCE

AMENDING AN ORDINANCE LIMITING THE NUMBER OF CLASS A LICENSES AND PROVIDING FOR THE ASSIGNMENT OF SAID LICENSES.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Chapter 21 of the Code of the City of New Bedford is hereby amended by striking out in the second paragraph of Section 4A the number 20 and inserting in place thereof the number 35 so that said Section 4A, as amended, shall read as follows —

Sec. 4A — Limitation on number of licenses — Penalty.

No more than 94 Class A public vehicle licenses shall be outstanding and in force at any one time.

No person, firm or corporation shall either directly or indirectly own or operate more than 35 Class A public vehicles at any one time. The City Council may suspend or revoke any or all Class A licenses held by a person, firm or corporation found to be in violation of this section.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

CITY ORDINANCE

Off Street Parking, Residences

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-One

AN ORDINANCE

AMENDING THE ZONING ORDINANCE RELATIVE TO OFF-STREET PARKING FOR RESIDENCES.

Be it ordained by the City Council of the City of New Bedford as follows :—

SECTION 1. The Zoning Ordinance of the City of New Bedford is hereby amended, as follows :—

Add after Section 7 a new section which shall read, as follows:

SECTION 7A. OFF-STREET PARKING FOR RESIDENCES.

Every building erected, converted, or changed in use after (effective date of this amendment) which contains any residence, housekeeping units, rooms for roomers or boarders, permitted home occupation or professional occupation shall be provided with off-street parking spaces as required in this section:

1. Every new building shall be provided with one off-street parking space for each family or housekeeping unit for which the building is designed.

2. In addition, one off-street parking space shall be provided for each professional or customary home occupation proposed to be carried on on the premises.

3. In addition, one off-street parking space shall be provided for each two rooms proposed to be let out to boarders or roomers.

4. Off-street parking spaces may be provided in garages, carports or in the open air; open-air parking spaces shall be at least 8½ x 20 feet.

5. Where three or more off-street parking spaces are required to be provided, all spaces shall be laid out so that cars can enter or leave them directly from a drive or aisle, or from the street.

6. Where five or more off-street parking spaces are required, all spaces shall be laid out so that cars entering a street may do so facing the street.

7. Off-street parking spaces shall be located on the same lot as the building they are intended to serve, except that they may be provided on an adjoining lot, or, in the case of five or more spaces, and subject to approval by the Board of Appeals, on a lot directly across the street.

8. Buildings on contiguous lots may be provided with common off-street parking facilities subject to approval by the Board of Appeals.

9. No open-air off-street parking space shall be located in a required tront yard, nor less than 4 feet from a side or rear lot line in a residence district.

10. All open-air off-street parking spaces and the drives or aisles giving access thereto shall be provided with a surface, such as concrete, asphalt or gravel, which will permit travel in all weather.

The requirements of numbers 1 through 10 aforementioned shall be considered minimum requirements and are not intended to prohibit the provision of more or larger spaces than required, consistent with other provisions of this article.

Add to Section 64, Board of Appeals, sub-section (b) a new (5) and (6), as follows:

(5) A permit to allow in a residence district the establishment of off-street parking facilities for more than five automobiles, provided that said parking facilities are on a lot directly across the street from the building they are intended to serve and that said parking facilities shall be used only by the occupants of the building and by persons visiting or doing business with said occupants.

(6) A permit to allow in a residence district the joint use of off-street parking facilities by buildings on contiguous lots provided that said parking facilities shall be used only by the occupants of the buildings they are intended to serve and by persons visiting or doing business with said occupants.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

Zoning Change No. 116

CITY OF NEW BEDFORD
In the Year One Thousand Nine Hundred and Sixty-One
AN ORDINANCE

EXTENDING THE BUSINESS ZONING CLASSIFICATION NOW EXISTING AT THE SOUTHEAST CORNER OF MT. PLEASANT STREET AND NAUSET STREET

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. That the Business zone now existing at the southeast corner of Mt. Pleasant Street and Nauset Street be extended as follows:

Starting at a point in the northerly line of Jefferson Street, distant easterly therein one hundred forty-eight and 53/100 (148.53) feet from the point of intersection of the easterly line of Mount Pleasant Street and the northerly line of Jefferson Street; thence northerly in the easterly line of land belonging to Antone and Mary Cardoza, a distance of thirty-five (35) feet to a point; said point being the beginning of this description;

Thence continuing northerly in said easterly line of land belonging to Antone and Mary Cardoza, a distance of forty-five (45) feet to a point in the southerly line of land belonging to Arnold R. Briden;

Thence easterly in said southerly line of land belonging to Arnold R. Briden, a distance of forty (40) feet to a point in the westerly line of land belonging to the City of New Bedford;

Thence southerly in said westerly line of land belonging to the City of New Bedford, a distance of forty-five (45) feet to a point;

thence westerly in a line parallel to and forty-five (45) feet distant from the second described line, a distance of forty feet to the point of beginning, containing 6.61 square rods,

all as shown on a plan on file in the office of the City Clerk; and the Zoning Map adopted as part of Chapter 27 of the Code of the City of New Bedford is hereby amended to conform with said reclassification.

CITY ORDINANCE

Height of Structures

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-One

AN ORDINANCE

REGULATING AND RESTRICTING THE HEIGHT OF STRUCTURES OR OBJECTS OF NATURAL GROWTH IN THE VICINITY OF THE NEW BEDFORD MUNICIPAL AIRPORT BY THE CREATION OF AIRPORT APPROACH PROTECTION REGULATIONS AND ESTABLISHING THE BOUNDARIES THEREOF.

In pursuance of the authority conferred by Chapter 90, Sections 40-A through 40-I inclusive of the General Laws and for the purpose of promoting the health, safety and general welfare of the public by preventing the creation, establishment and maintenance of airport hazards, thereby protecting the lives and property of users of the New Bedford Municipal Airport and the occupants of land in its vicinity and preventing destruction or impairment of the airport and the public investment therein.

Be it ordained by the City Council of the City of New Bedford as follows:

SECTION 1. The New Bedford City Code is hereby amended by the insertion of a new Chapter 28, viz:—

CHAPTER 28 — "AIRPORT APPROACH PROTECTION ORDINANCE OF THE NEW BEDFORD MUNICIPAL AIRPORT."

Section 2. As used in this ordinance, unless the context otherwise requires:

(a) "Airport", means the New Bedford Municipal Airport.

(b) "Airport Approach Zone," means any airspace above the areas defined and shown on a map entitled Map of Approach Zones, New Bedford Municipal Airport, New Bedford, Massachusetts, dated January 3, 1961, and which is attached hereto and made a part hereof, as provided in G. L., Chapter 90, Section 40A.

(c) "Airport Hazard", means any structure or tree which extends into any airport approach zone.

(d) "Administrative Agency", means the New Bedford Airport Commission which is hereby designated as the agency charged with administering the regulations herein prescribed.

(e) "Person", means any individual, firm, partnership corporation, company, association, joint stock association; and includes any trustee, receiver, assignee or other similar representative thereof.

(f) "Structure", means any object or structure installed by man, including any object regulated or licensed under any other provision of law.

(g) "Tree", means a tree or other object of natural growth.

Section 3. It is hereby declared that the existence of any airport hazard endangers the lives and property of the users of the New Bedford Municipal Airport and the occupants of the land in its vicinity, and effects a reduction of the area available for the landing, taking off and maneuvering of aircraft, thus tending to impair the utility of the airport and the public investment therein. Accordingly, it is necessary in the interest of public health, safety and general welfare that the creation, establishment or maintenance of airport hazards be prevented by exercise of police power, without compensation to any person, except as herein specifically provided.

Section 4. Except as otherwise provided in this ordinance no structure may be erected or altered or any tree permitted to grow or be maintained to a height which would exceed the elevation of the end of the runway by a vertical distance hereby established for each of the following areas, as shown and indicated on the map referred to in Section 2:

> Area A. One-fortieth of the shortest horizontal distance from the structure or tree (or any part thereof) to a line 200 feet outward from the parallel to the end of the runway within the approach zone in which the structure or tree is located.
>
> Area B. One-fiftieth of the shortest horizontal distance from the structure or tree (or any part thereof) to a line 200 feet outward from and parallel to the end of the runway within the approach zone in which the structure or tree is located.
>
> Area C. One-fortieth of the shortest horizontal distance from the structure or tree (or any part thereof) to the outer end of Area B, such vertical height to be exclusive of and in addition to the vertical height limit permitted at the outer end of Area B, within the approach zone in which the structure or tree is located.

Except as otherwise provided in this ordinance no structure may be erected or altered or any trees permitted to grow or be maintained to a height which would exceed the elevation of the Horizontal Surface, the Conical Surface, or the Transitional Surfaces, as hereby established for each, as shown and indicated on the map referred to in Section 2:

Horizontal Surface. An elevation of two hundred and twenty-nine feet above mean sea level, except that if Section 4 requires a lower elevation within Area A or Area B, at the point in question, such lower elevation shall control.

Conical Surface. An elevation rising uniformly from two-hundred and twenty-nine feet above mean sea level from the inner edge of the Conical Surface (being also the outer edge of the Horizontal Surface) to four hundred and seventy-nine feet above mean sea level at the outer edge of the Conical Surface, except that if Section 4 requires a lower elevation with Area A, Area B, or Area C at the point in question, such lower elevation shall control.

Transitional Surfaces. The elevation of the Transitional Surfaces shall be that of a set of planes sloping upward and outward from the edges of Areas A, B, and C to meet the

Horizontal and Conical Surfaces. Each plane shall rise one foot for every seven feet from the edge of Area A, Area B, or Area C, whichever may be applicable, measured horizontally at right angles to the nearest runway centerline.

Section 5. The limitations prescribed in this ordinance shall not be considered to require the removal, lowering or other change or alteration of any structure or tree not conforming to these regulations as of the effective date thereof or otherwise interfere with the continuance on any such non-conforming use. Nothing herein contained shall be construed to permit any such non-conforming structure or tree to be substantially altered or repaired, rebuilt, allowed to grow or replanted so as to become a greater hazard to air navigation than it was on the effective date of this ordinance.

Section 6. Nothing in this ordinance shall be construed as prohibiting the growth, erection, or maintenance of any tree or structure to a height up to 20 feet above the surface of the land.

Section 7. The New Bedford Airport Commission is hereby designated as the Administrative Agency charged with the duty of administering and enforcing the regulations herein prescribed. The duties of such agency shall include that of hearing and deciding all permits under Section 8.

Section 8. Any person desiring to erect or increase the height of any structure, or to permit the growth of any tree, in a manner not conforming to the Airport Approach Protection Regulations as herein established, or to establish the right so to do, may apply to the New Bedford Airport Commission for a variance from the regulations applicable to his property. Such variance may be allowed where a literal application or enforcement of such regulation would result in practical difficulty or unnecessary hardship and the relief granted would not be contrary to public interest. Any permit or variance granted under this section shall be conditioned as to require the owner of the structure or tree to permit the New Bedford Airport Commission at its own expense to install, operate and maintain suitable obstruction markings or obstruction lights thereon.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

CITY ORDINANCE

House Trailers, etc.

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-One

AN ORDINANCE

AMENDING THE ZONING ORDINANCE RELATIVE TO "HOUSE TRAILERS" and "TRAILER CAMP or PARK".

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. The Zoning Ordinance of the City of New Bedford is hereby amended as follows:—

Chapter 27, Section 2, of the New Bedford City Code be amended by addition of the following "Definitions";

18. "TRAILER", shall mean any so-called automobile trailer, trailer coach, mobile home, including any portable structure, means of conveyance, or vehicle so designed, constructed, altered or converted in any manner as to permit occupancy thereof for dwelling or sleeping purposes.

19. "TRAILER CAMP or PARK" shall mean any lot, parcel or tract of land, upon which two or more trailers, occupied for dwelling or sleeping purposes, are located, regardless of whether or not a charge is made for such an accommodation.

Chapter 27 be further amended by adding immediately after Section 7A, (as proposed by City Planner Richard Wengraf) the following:

Section 7B. A "TRAILER" shall not be occupied for dwelling or sleeping purposes within any Residential District, nor shall more than one trailer be parked, stored or located on any lot in a Residential District.

Chapter 27, Section 46, be amended by adding:

4. "TRAILER" may be allowed if in conformance with other city ordinances as they apply to structures and buildings.

5. "TRAILER CAMP" may be allowed if in conformance with other city ordinances.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

IN CITY COUNCIL, November 9, 1961

CITY ORDINANCE

Police Details at Private Functions

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-One

AN ORDINANCE

RELATIVE TO POLICE DETAILS AT PRIVATE FUNCTIONS

Be it ordained by the City Council of the City of New Bedford as follows :—

SECTION 1. Section 18 of Chapter 19 of the Revised City Code is hereby amended by striking out the whole of Section 18 and inserting in place thereof the following new Section —

CITY CODE

Chapter 19 — Section 18

(Revision)

Employment of persons to perform police duties at dances, carnivals, circuses, athletic exhibitions, amusement parks or any other public gathering to which admittance is obtained with or without a charge, or to serve on a highway traffic detail or at any other function requiring the services of a police officer, shall be made only from the membership of the regular force of the New Bedford Police department, not on actual duty. Compensation for such services shall be paid by the person, organization, or political sub-division other than the City of New Bedford requiring the services of such police officer and shall be retained personally by the officer performing the service. The schedule of compensation for such police work shall be determined by the Chief of Police, with the approval of the Mayor.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

CITY ORDINANCE

Susan G. W. Jones Fund

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-One

AN ORDINANCE

ACCEPTING THE BEQUEST UNDER THE WILL OF SUSAN G. W. JONES AND DESIGNATING IT "THE SUSAN G. W. JONES FUND".

Be it ordained by the City Council of the City of New Bedford as follows :—

SECTION 1. Chapter 6 of the Code of the City of New Bedford is hereby amended by adding a new section, to be known as Section 19, which shall read as follows:

SECTION 19. — Susan G. W. Jones Fund.

The City of New Bedford accepts the legacy of Eleven Thousand Five Hundred Sixty-Two Dollars and Eighty-One Cents bequeathed to the City of New Bedford, to be held and invested as a permanent fund for the use of the New Bedford Free Public Library, to be applied in the purchase of books and equipment under the Fifth Clause of the last will of Susan G. W. Jones, late of New Bedford, the income thereof to be paid to the Board of Trustees of the Free Public Library of said New Bedford.

The Board of Trustees of bequests, gifts and trust funds for the City of New Bedford is hereby authorized and directed to receive for the City of New Bedford the aforesaid gift and to manage, direct and control said legacy in accordance with the provisions of said will and of law and ordinance.

This bequest shall be known as "The Susan G. W. Jones Fund".

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).
